1. User Creation & Login process to Access Kisan Rin Portal.

Overview:

To enter & manage the Kisan Credit Card data on Kisan Rin Portal (KRP) each Bank need User credentials. The User ID will be created on Pradhan Mantri Fasal Bima Yojana (PMFBY) Portal and the same ID will work on Kisan Rin Portal.

2. Creation of User credentials

Every Bank must have the **HQ Admin ID** to access the KRP and for that please follow the below given process.

2.1. Creation of HQ Admin to Access Kisan Rin Portal.

Request for HQ Admin ID creation on Bank's letterhead with seal & signed by authorized-signatory.

Letter to be addressed: CEO, PMFBY (Department of Agriculture & Farmer Welfare) with following Details.

- Name.
- Designation
- Official Email
- Unique Mobile Number.

The letter soft copy to be shared through Banks official email account,

To: deepak.kesare@auriopro.com ,alok.prajapati@aurionpro.com, ashishkumar.gupta@aurionpro.com
CC - ajay.k.singh@nic.in, anil.kumar004@gov.in,kartikey.upadhyay@aurionpro.com , minaxi.singh@undp.org,taraka.krishna.kishore.nelapatla@undp.org

2.2. Creation of User ID on Pradhan Mantri Fasal Bima Yojana (PMFBY) Portal.

Once the HQ Admin ID is created by Super Admin then the rest of the **User ID** will be created & managed on Pradhan Mantri Fasal Bima Yojana (**PMFBY**) portal to access the Kisan Rin Portal (KRP).

HQ Admin to create the Login ID for:

- HQ User
- Branch Admin.
- Branch User.
- ZO Admin.

ZO Admin to create the Login ID for:

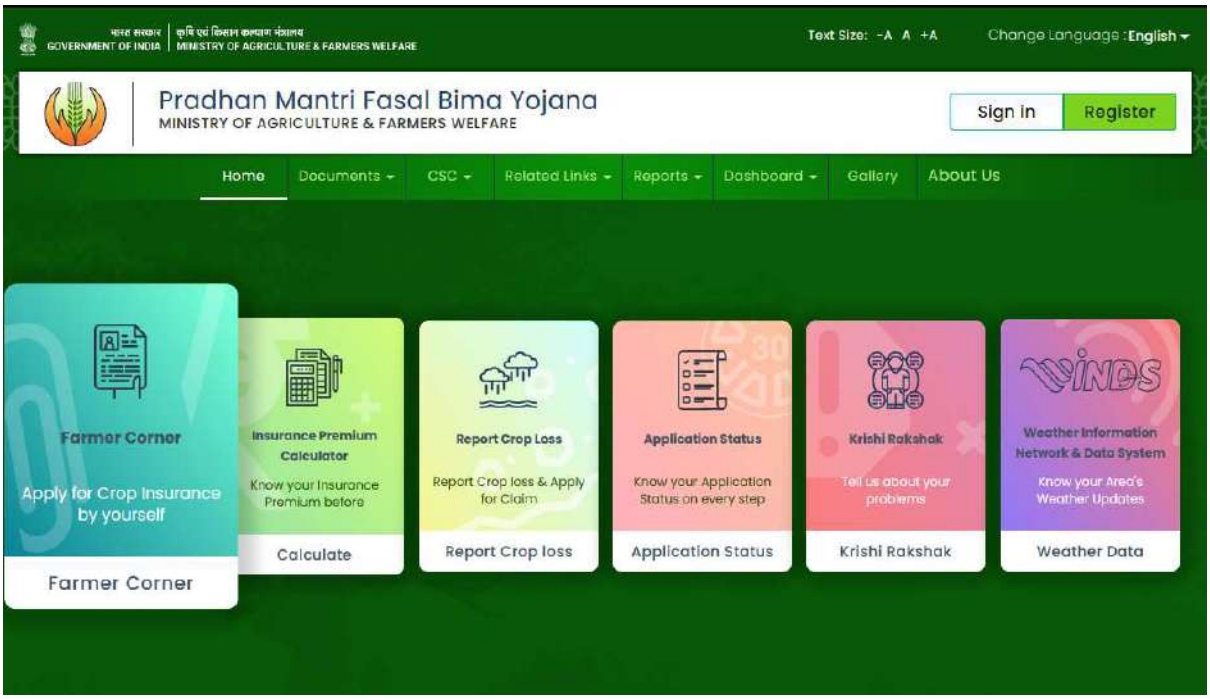

- RO Admin.

Branch Admin to create the Login ID for:

- Branch User.
- PACS User.

2.3. Accessing the PMFBY Portal

Open the web browser on the desktop/laptop.

Enter the URL: https://pmfby.gov.in

Once the home page of the portal is appear on the screen

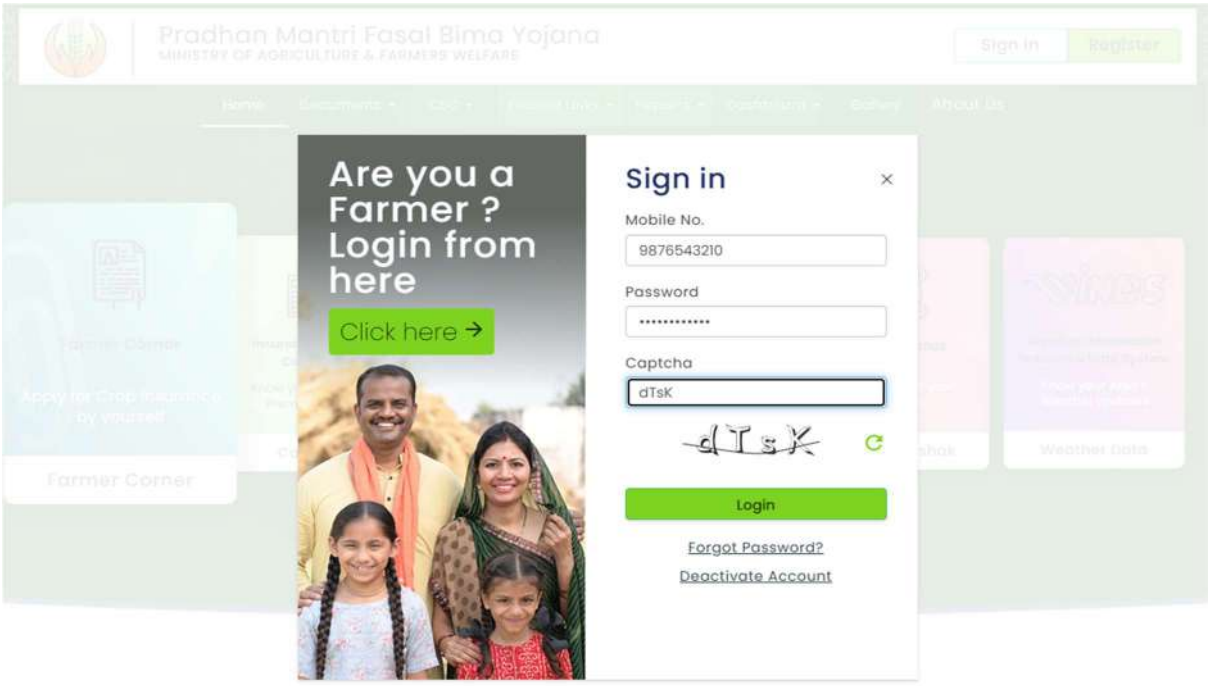

- Click on **Sign in** tab.

To login into Kisan Rin Portal.

Enter:

- User ID
- Password
- Captcha code

Click on **Login** tab.

Note:

- User can refresh the captcha code to get a new code.
- User can reset the password from the Forgot password? link.

2.4. Creation of HQ User ID

To create HQ User.

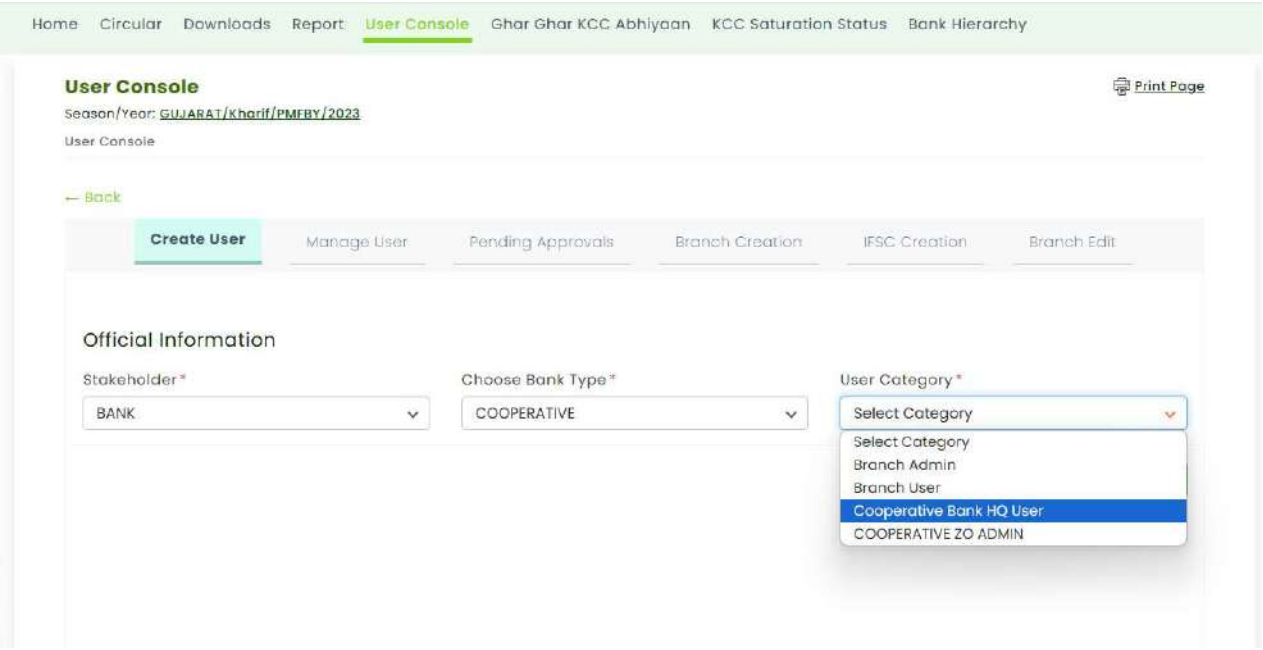

- Click on **User Console** menu.

Under user console:

- Click on **Create User** tab.

Select the:

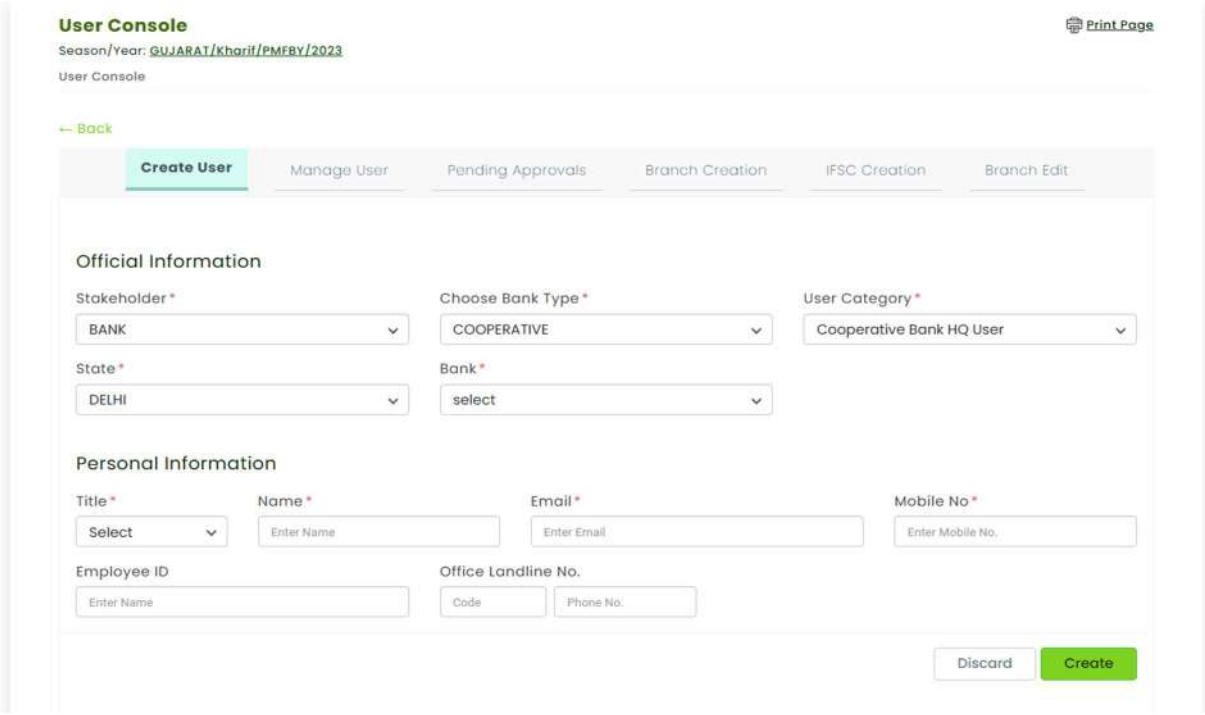

- Bank Type.
- User Category.
    - **HQ User**

Enter the Official & Personal information of the User and click on **Create** tab.

Note:

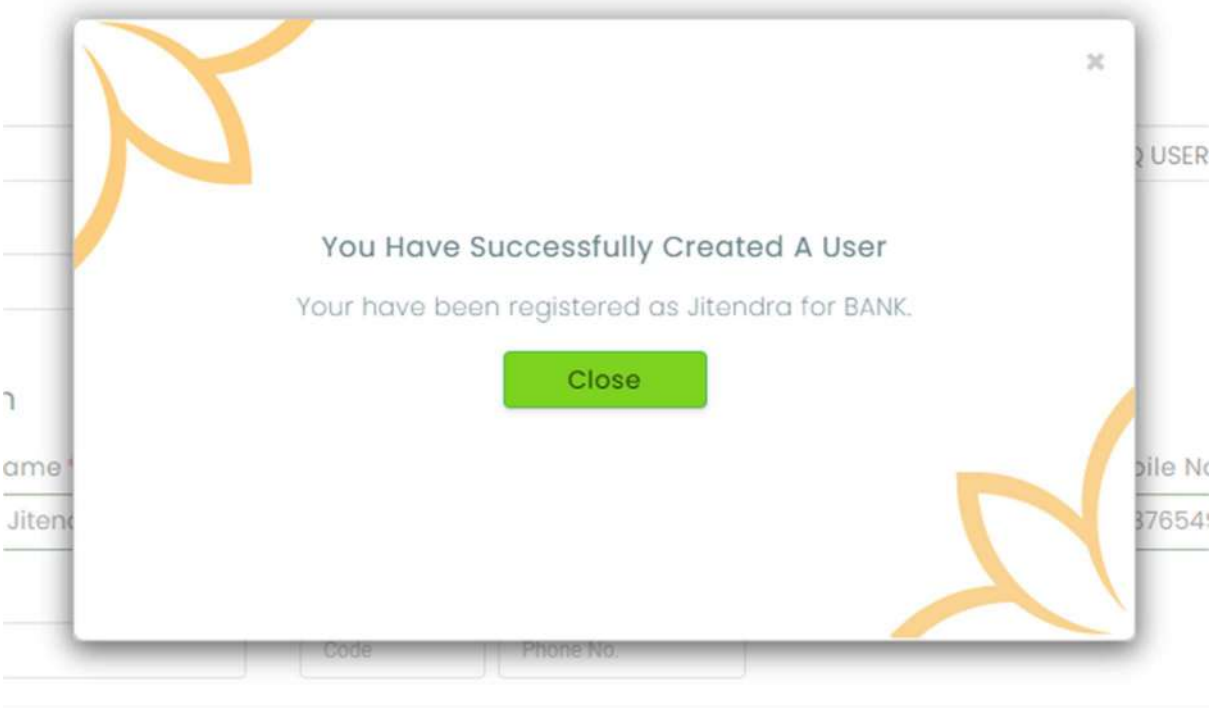

All the red star mark field (*) are mandatory.

On creation of the User ID

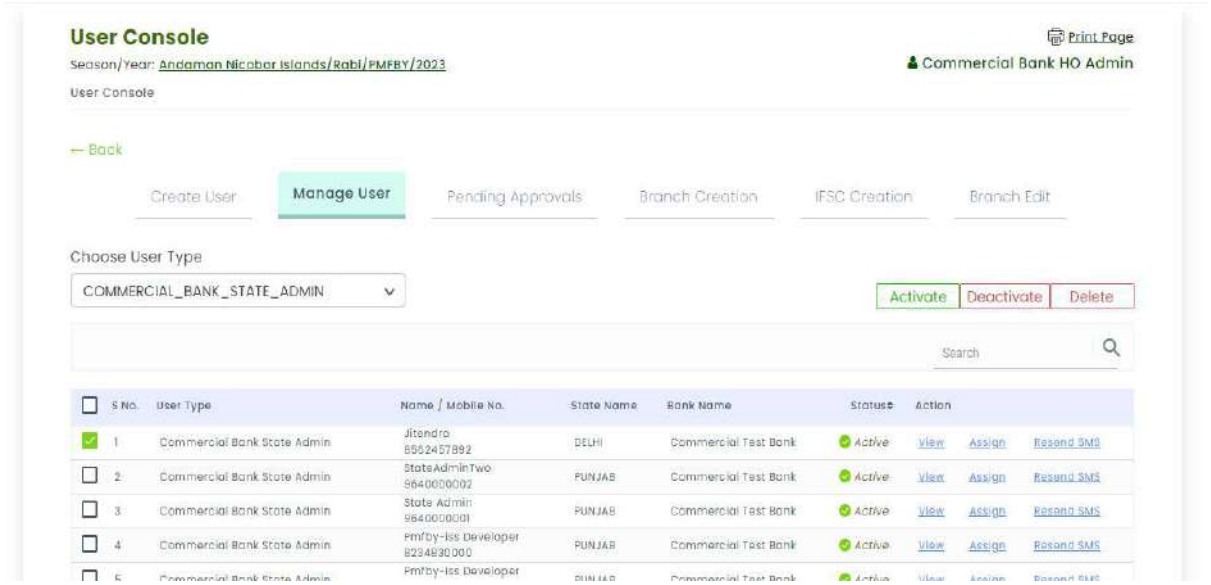

A pop up message will flash as **You Have Successfully Created A User**.

Important ! Once the User created the **Password** will be send to the newly created user's registered mobile number.

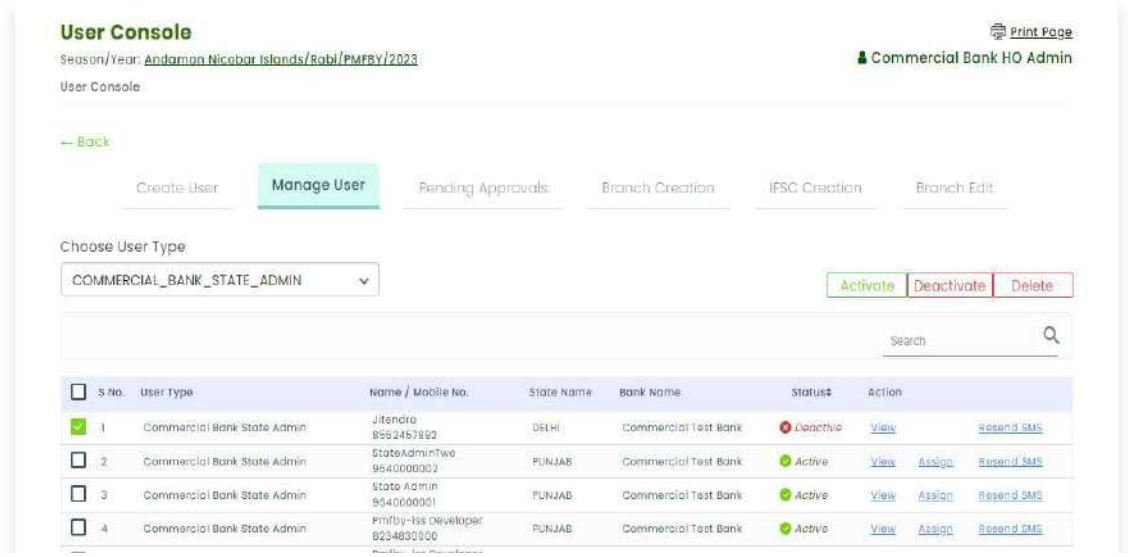

Manager User:

Under Manage User option the Admin can Activate/Deactivate/Delete a created User.

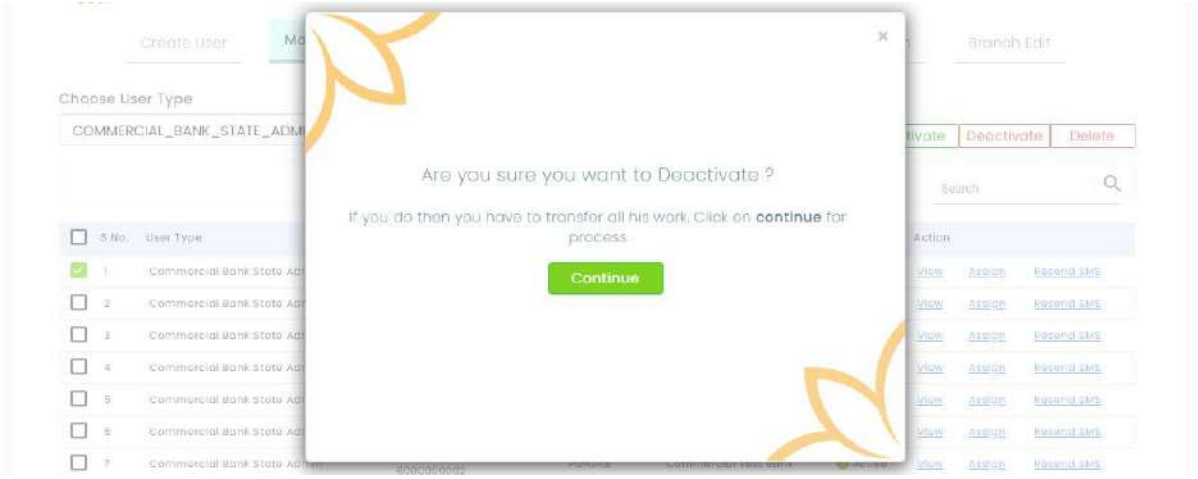

Activate: If any User to be Activate.

- Select the User and click on Activate tab.

Deactivate: If any User to be Deactivate.

- Select the User and click on Deactivate tab.
- A pop up message will flash on the screen and ask **Are you sure you want to deactivate?**
- User to click on **Continue tab**.

Delete: If any User to be deleted.

- The User must be Deactivate first so follow the deactivation process.
- Select the **Delete** tab.
- A pop up message will flash on the screen and ask **Are you sure you want to delete?**.

- User to click on **Continue** tab.

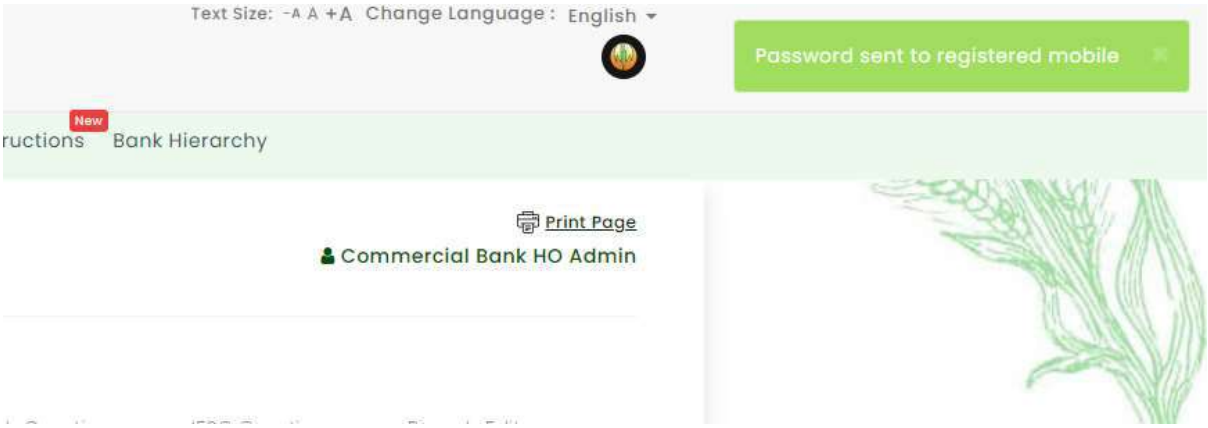

Under Manage User option the User will find **Action Menu.**

In Action menu User will get the option:

- **View**
- **Assign**
- **Resend SMS.**

Resend SMS: To reset the password of the created User

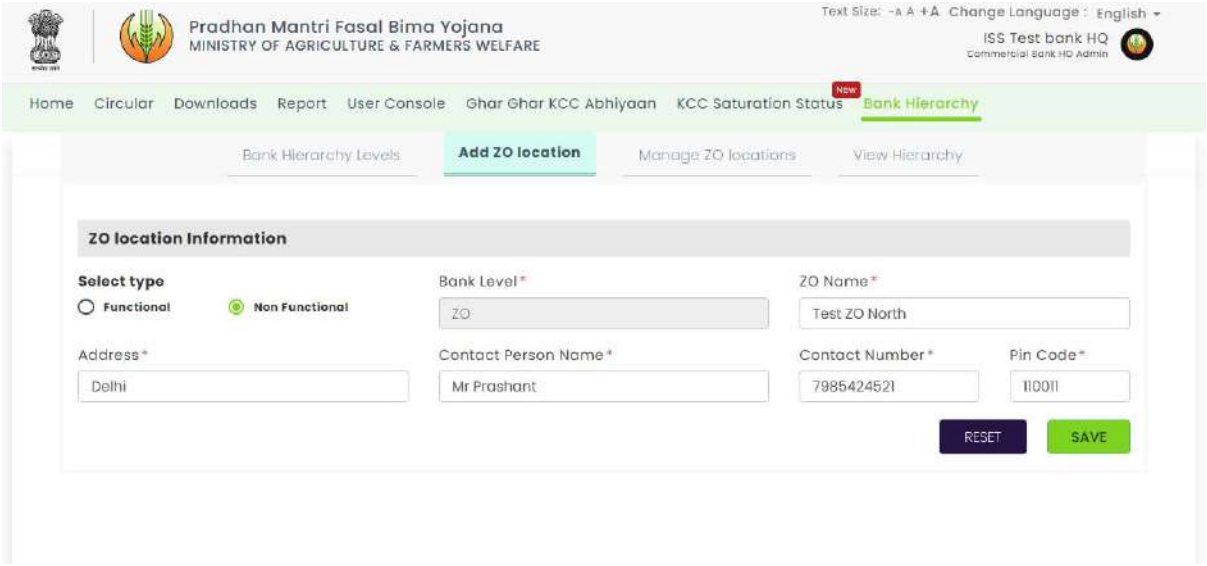

On click of Resend SMS a new password will be created for the User.

2.5. Creation of ZO Admin ID

Log in as HQ Admin On PMFBY Portal.

- Click on Bank Hierarchy menu.

Once the Bank Hierarchy page appear on the screen.

- Click on Add ZO Location to create a location for ZO Admin.

- ZO Name
- Address
- Contract Person Name
- Contact Number
- Pin Code.

After entering all the mandatory details.

- Click on Save tab.

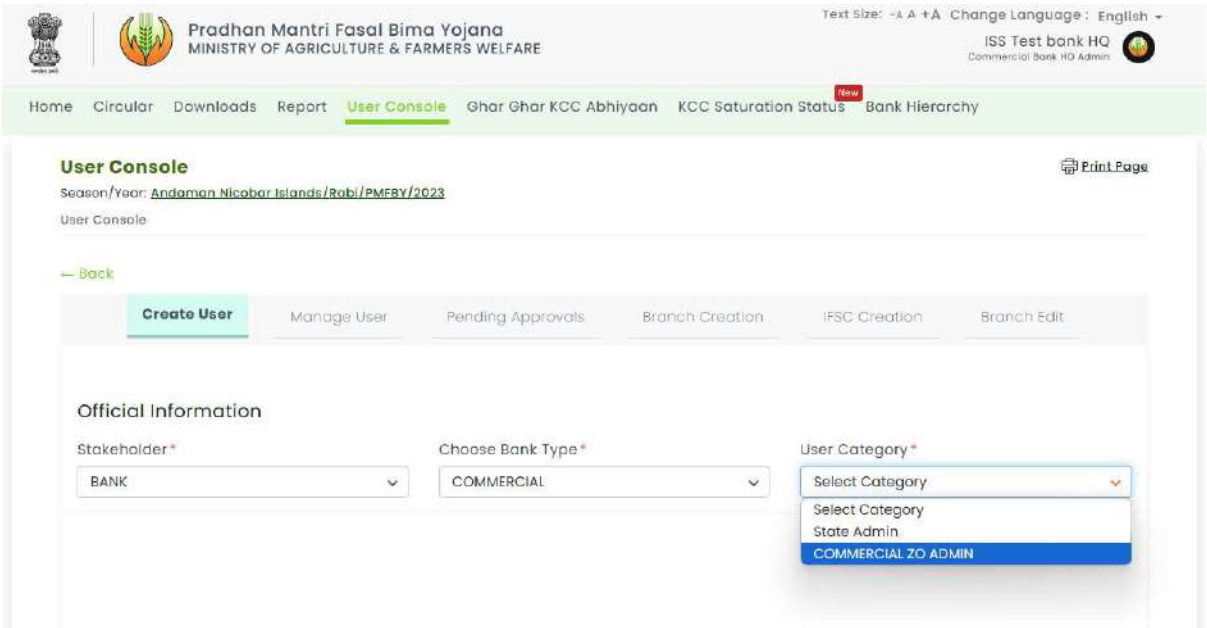

Note: On click of save a ZO Location will get created.

To assign the Admin to the ZO

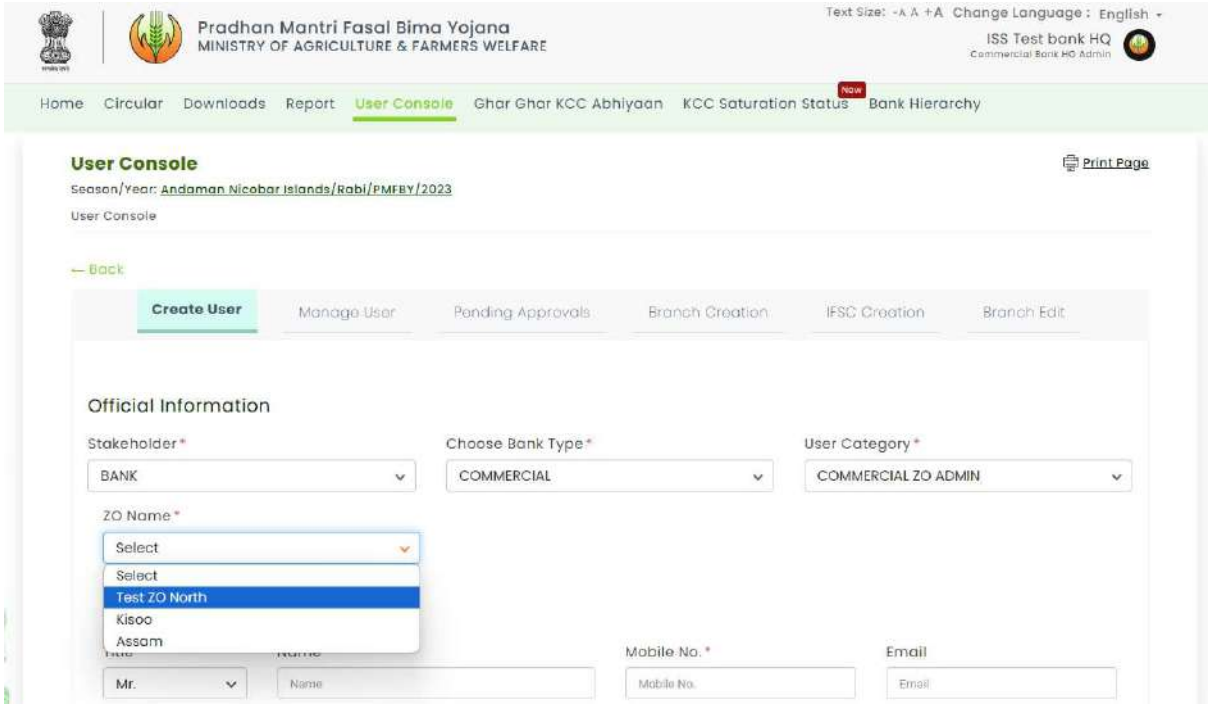

- Click on Create User under User Console menu.

Select the User category.

- Commercial ZO Admin.

Select the ZO location from the dropdown menu.

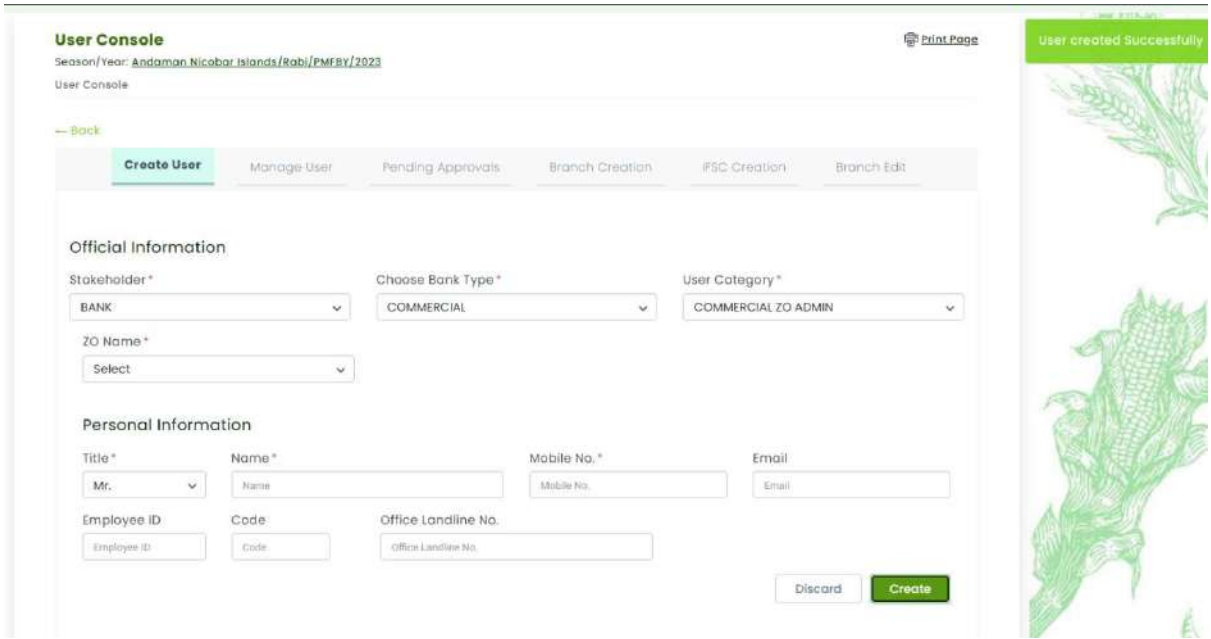

Enter the information.

- Title
- Name
- Mobile Number

After entering all the mandatory details.

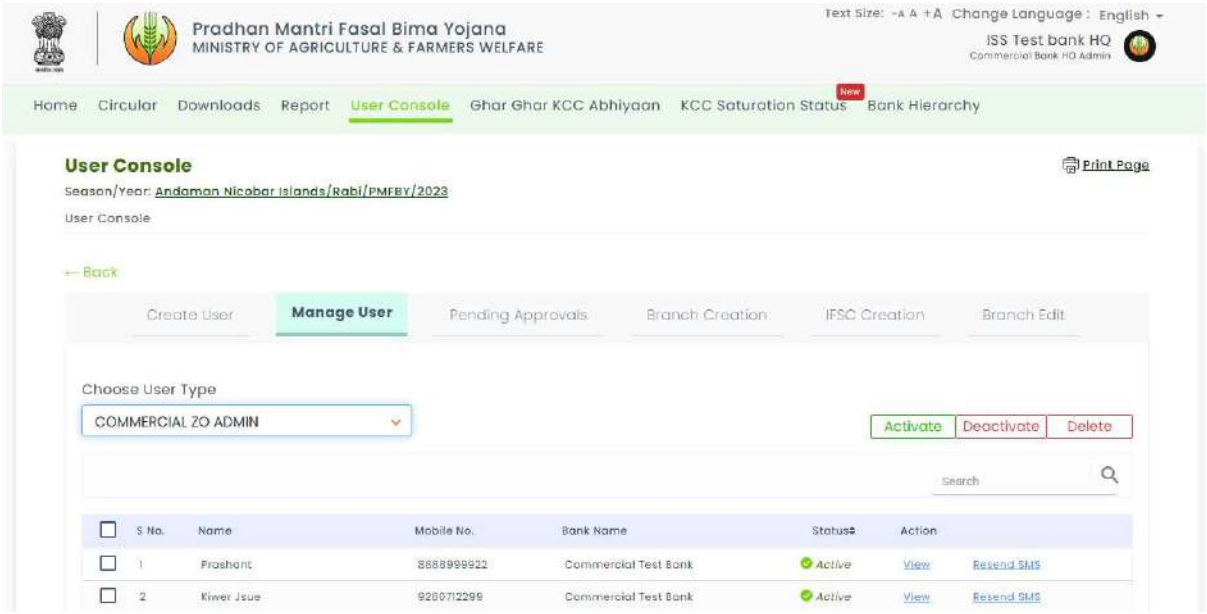

- Click on **Create** tab.

Manager User

Under Manage User option the Admin can Activate/Deactivate/Delete a created User.

User mange is same for all Users.

2.6. Creation of RO Admin

HQ Admin will create the RO Admin.

- If the Bank Hierarchy level is **HQ > RO > Branch**.

ZO Admin will create the RO Admin.

- If the Bank Hierarchy level is **HQ > ZO > RO > Branch**

To create the RO admin follow the same process as State Admin creation.

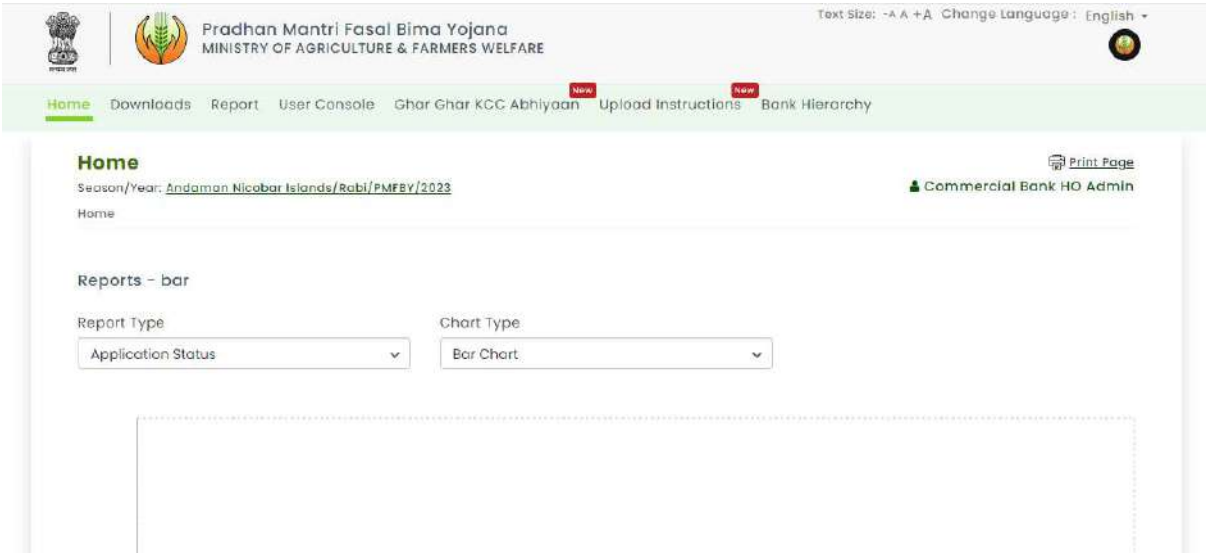

2.7. Creation of Branch Admin in PMFBY Portal

State Admin is authorized to create the Branch Admin & User ID.

Before creation of Branch ID HQ Admin to create the Branch first.

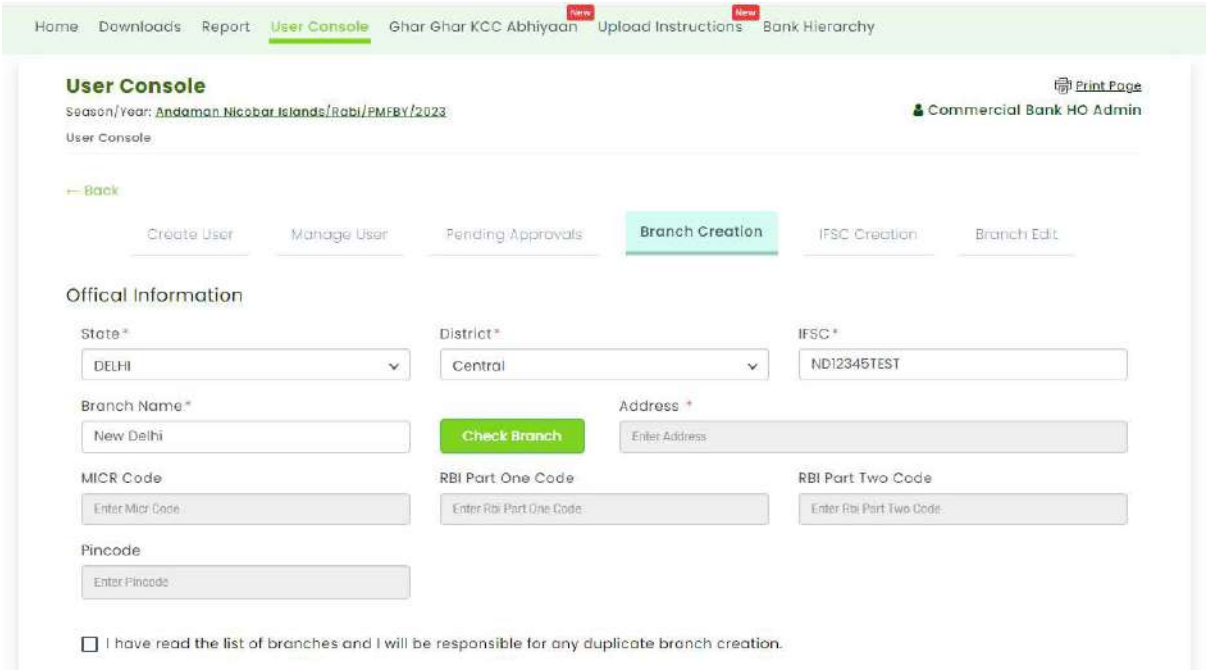

Create Bank Branch:

- HQ Admin to login on PMFBY Portal.
- Select **User Console** tab.

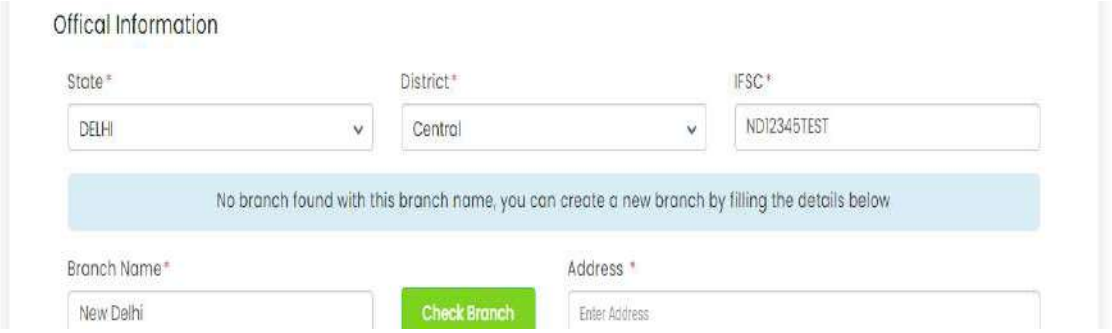

User to click on **Branch creation** tab.

- Select the State & District from the drop down menu.
- Enter the IFSC Code.
- Enter the Branch Name.

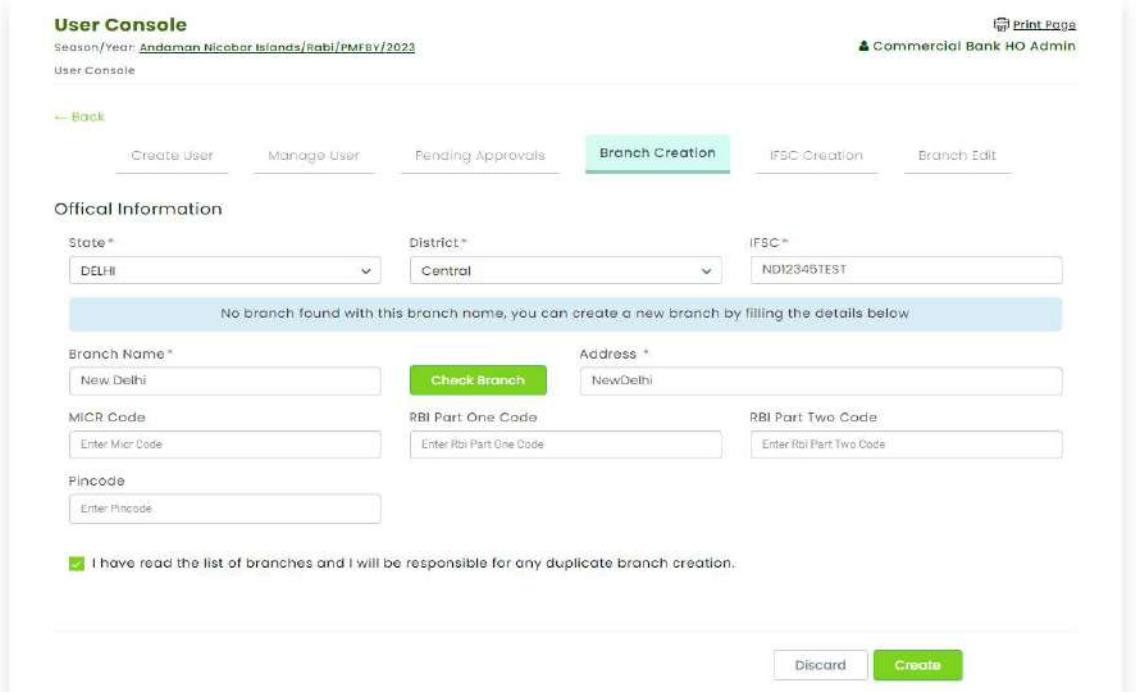

Note: Click on **Check Branch** tab to search whether the Branch is previously created or not.

On click of Check Branch If No branches are created previously with the same name then a massage will appear in the middle of the screen that "**No branch found with this name, you can create a new branch**".

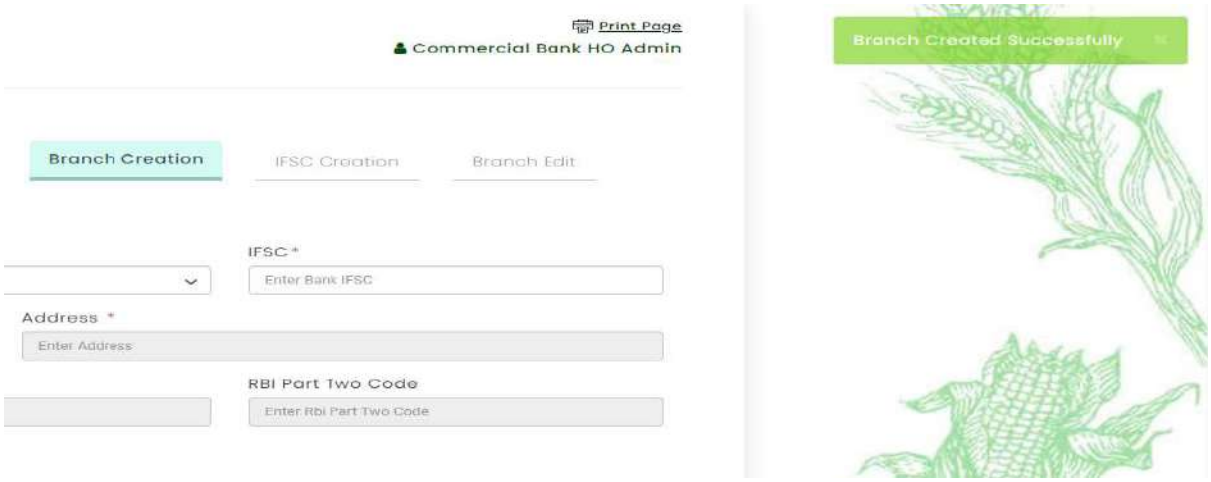

Once the Branch verification completed then:

- Enter the Address details.
- Tick Mark the Check box.
- Click on the **Create** tab.

On Successfully created Branch a message will flash in the right hand side of the screen.

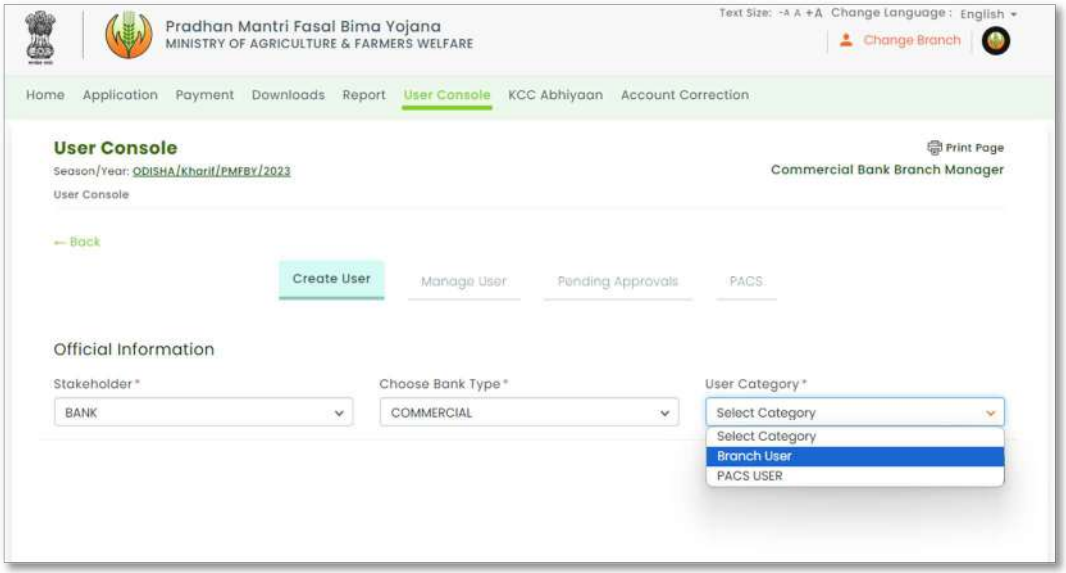

On creation of a Branch pop up message will flash on right hand side of the screen as **Branch Created Successfully.**

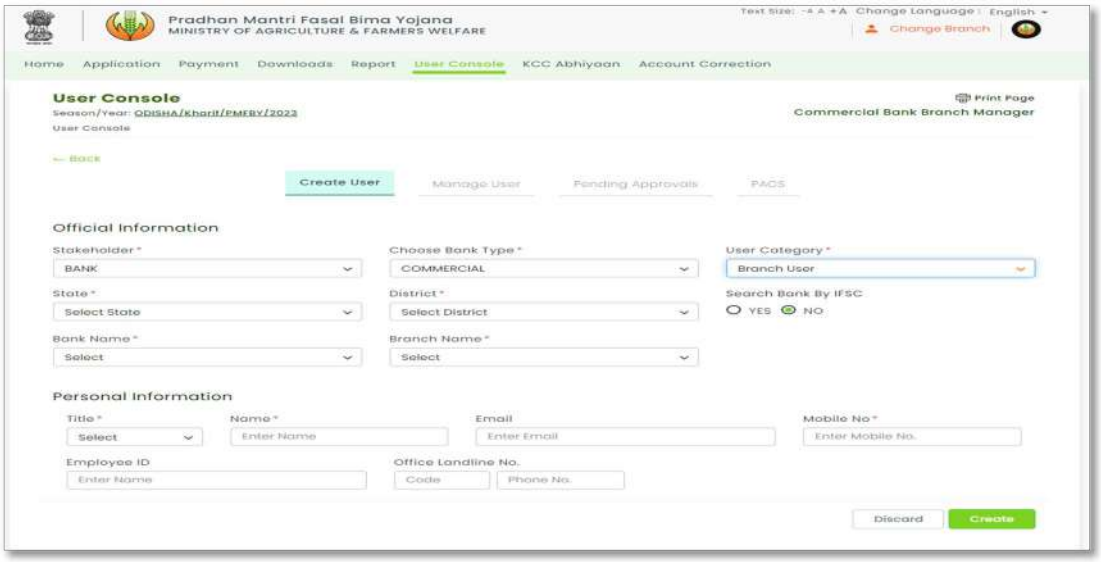

2.8. Creation of Branch/PACS User Credentials from Branch Admin Id

Branch Admin to select the **Create User** tab.

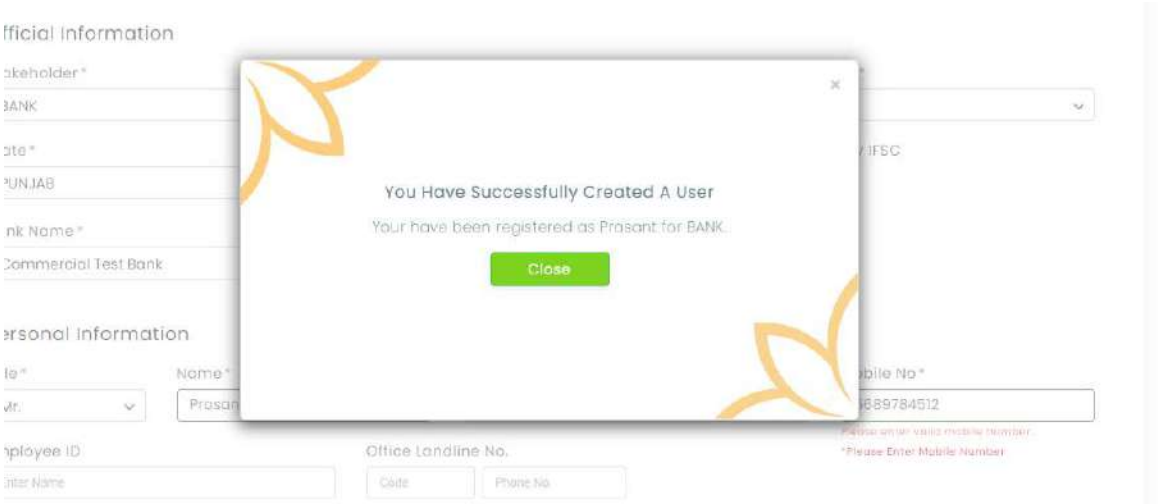

- Select the Stakeholder.
- Select the Bank Type.
- Select the User Category as Branch/PACS User.

Enter the Official & Personal Information details & click on **Create**.

After Creating a User a massage will pop up "**You Have Successfully Creates a User**".

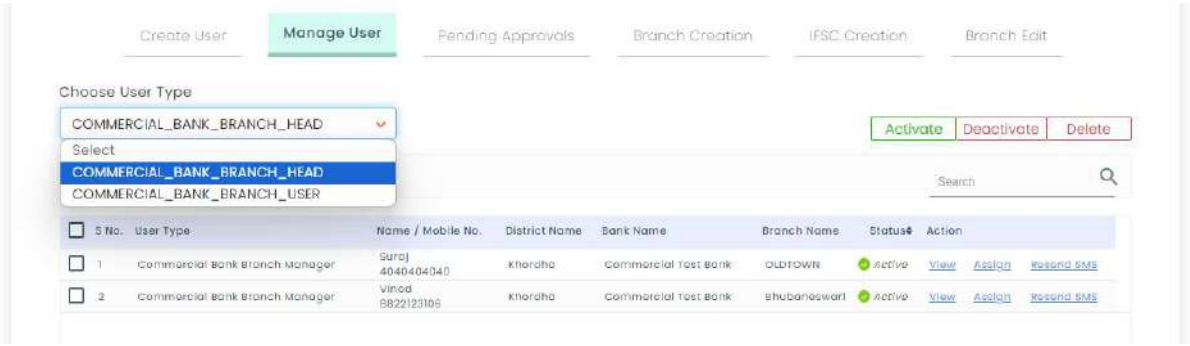

Note: Newly created user will receive a Password in the registered mobile number

Manager User

Under Manage User option the Admin can Activate/Deactivate/Delete a created User.

- **Activate:** If any User to be Activate.
- **Deactivate**: If any User to be Deactivate.
- **Delete:** If Any User to be deleted

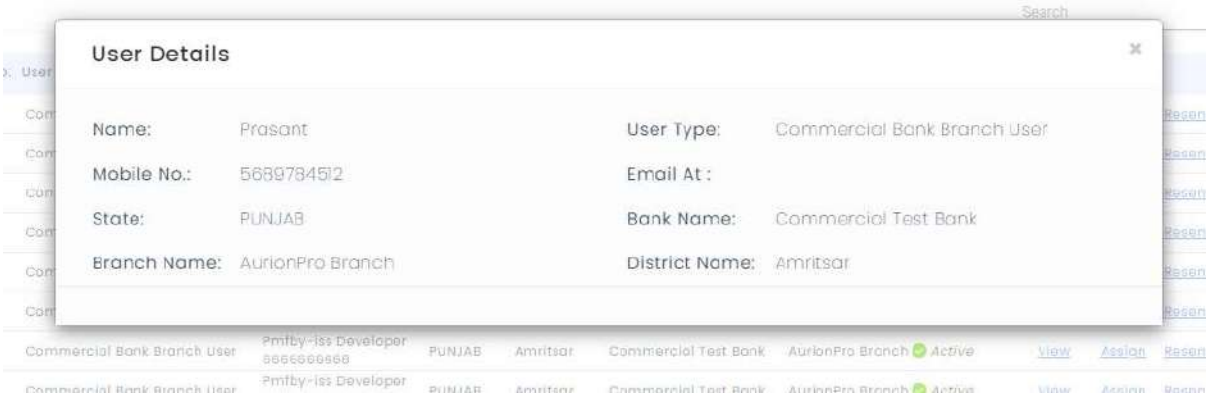

Under Manage user option the User will find Action menu.

Under Action menu User will get the option:

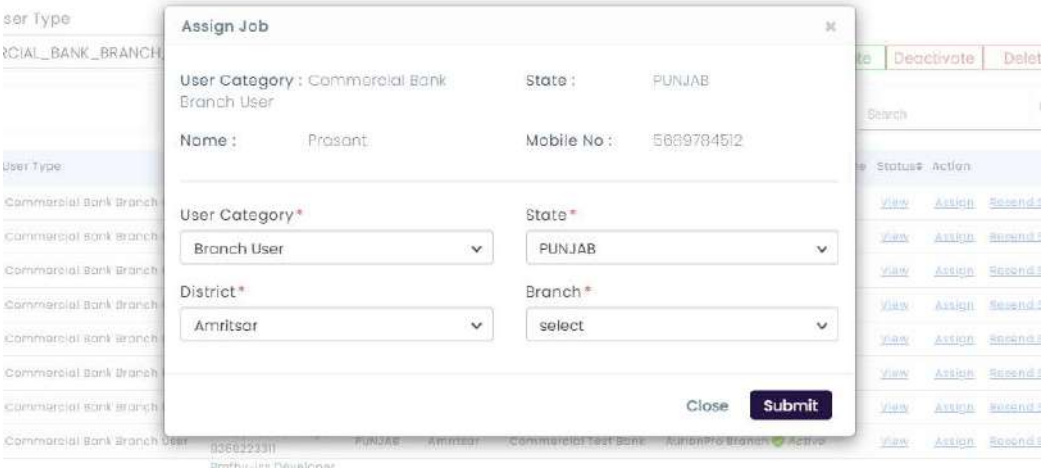

- **View**
- **Assign**
- **Resend SMS.**

View: User Details will be verified.

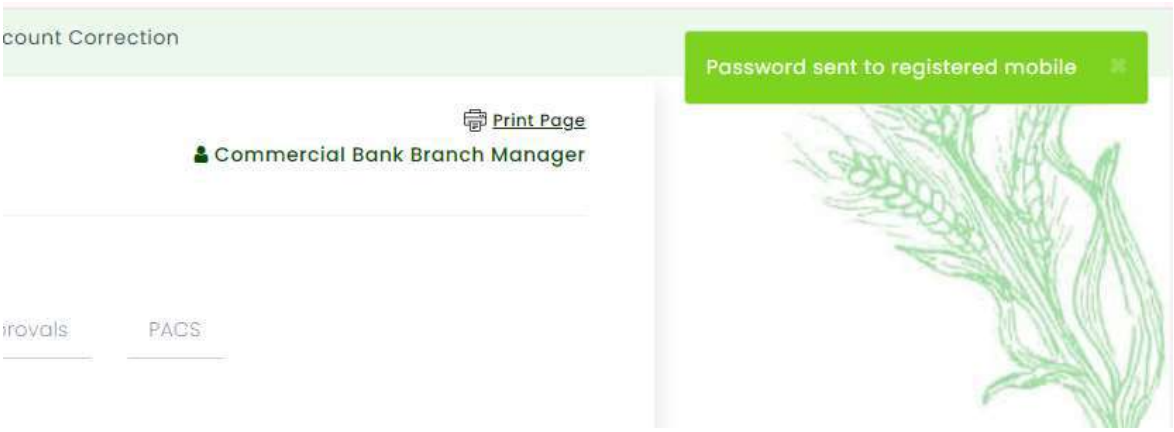

Assign: Assign other branch.

Created Branch User can be assigned other job as Branch User or PACS User.
Select the State, District & Branch to be assigned & click on **Submit** tab.

Resend SMS: To reset the password of the created User

Created Branch User can be assigned other job as Branch User or PACS User.
Select the State, District & Branch to be assigned & click on **Submit** tab.

3. User Login Process on KRP Portal

Open the web browser on the desktop/laptop.

Enter the URL: https://fasalrin.gov.in

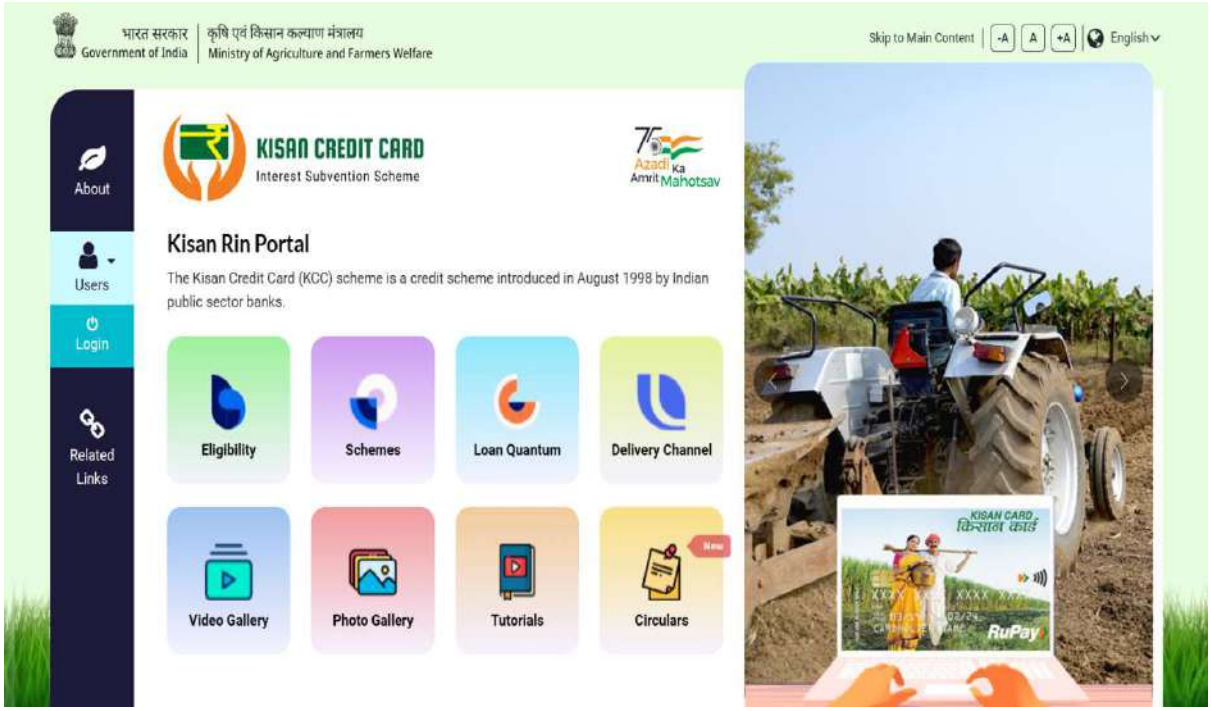

User shall be navigated to "**home page"**.

On the Kisan Rin Portal home page:

- Click on "**Login**" sub-menu under Users menu.

User shall be navigated to "**Login Page**".

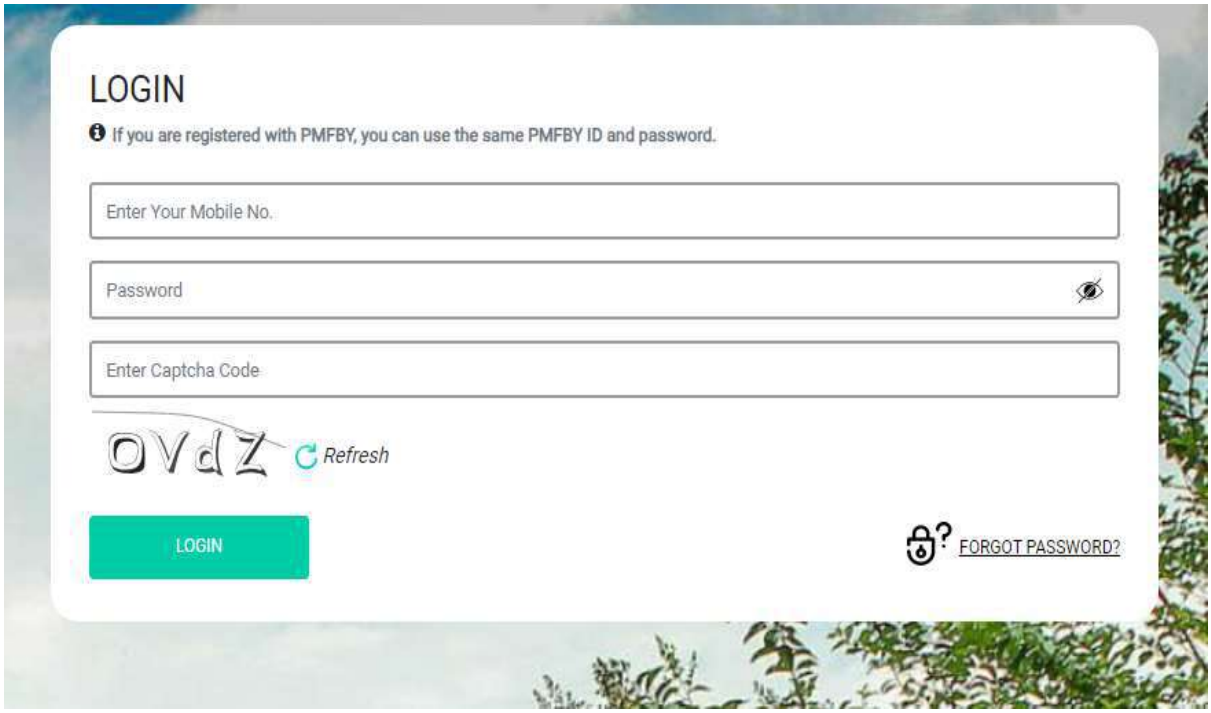

On Login page:

Enter the:

- User ID (Mobile number).
- Password.
- Captcha code.

After entering the details:

- Click on **login** tab.

Note:

- User can **Refresh** the captcha code to get a new code.
- User can reset the password from the **Forgot password** link.

4. Application Processing Mode on KRP

It is the mode by which Banks will enter the Kisan Credit Card (KCC) data on Kisan Rin Portal (KRP)

There are three types of processing mode available on Kisan Rin Portal (KRP).

1. **Full Automation: End-to-end electronic mode.**
2. **Hybrid Mode:**
3. **Manual entry mode.**

Note:

- Bank can select any one of the processing mode for a Financial Year.
- HQ Admin is authorized set the Processing mode on Kisan Rin portal.
- Once the processing mode set it can't be change any more.
- This is a onetime activity for the Bank a Financial Year.

Let's understand one by one.

Full Automation Mode: End-to-end electronic mode.

Complete data of farmers/borrowers of KCC including information about loans sanctioned and eligible interest subvention claims of the banks as per pre-defined schema/fields shall be transferred electronically through API services by integrating the CBS/Middleware of the respective banks with the KCC-ISS Portal.

Hyprid Mode:

Partial data of farmers/borrowers of KCC including information about loans sanctioned and eligible interest subvention claims of the banks as per pre-defined schema/fields shall be transferred electronically through API services by integrating the CBS/Middleware of the Kisan Rin Portal (https://fasalrin.gov.in/) respective banks with the KCC-ISS Portal. For rest of the fields which are not available in the CBS/Middleware of the respective banks, the requisite fields will be entered manually on KCC ISS portal by the respective branches of the bank, using the specific login credentials.

Manual Mode:

Complete data of farmers/borrowers of KCC including information about loans sanctioned and eligible interest subvention claims of the banks as per pre-defined template shall be directly entered on the KCC-ISS portal by the respective bank branch users of the bank using the specific login credentials

5. ISS Integration Settings for Full Automation & Hybrid Mode:

To enter the KCC Loan & Claim account details on Kisan Rin Portal through full automation or hybrid mode HQ Admin to follow these below given steps.

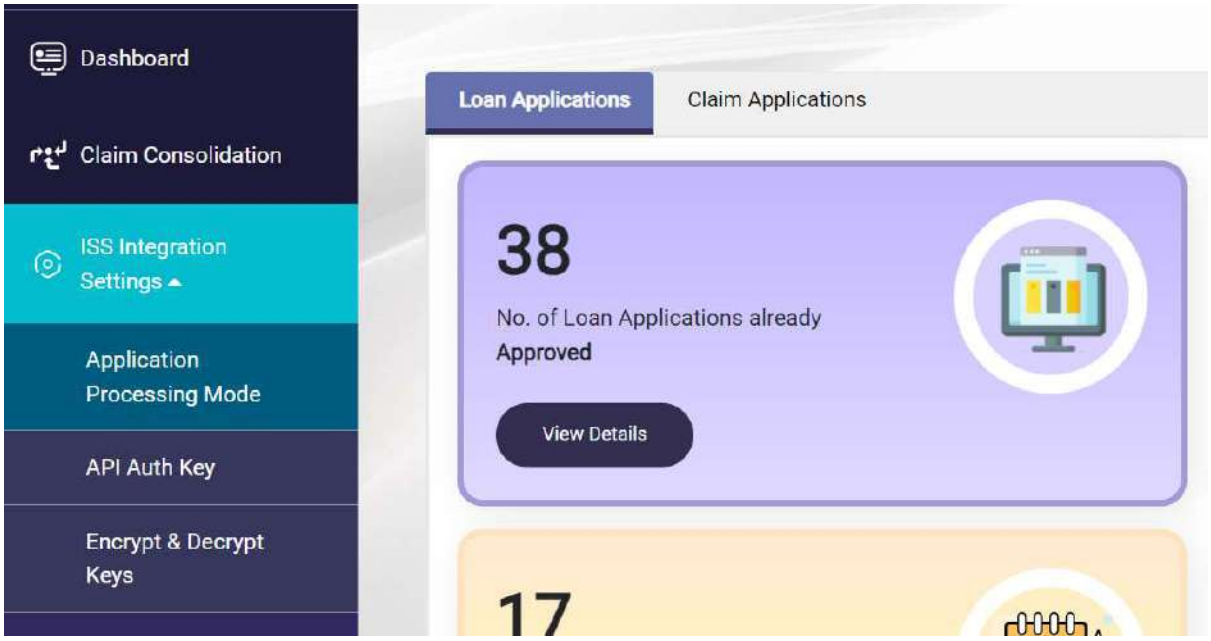

1. Set the Application Processing Mode (Full Automation/Hybrid).
2. Generate the API Auth Key.
3. Generate the Encrypt & Decrypt Key.
4. API field configuration.

Note: This is onetime activity for each Financial Year.

Lets understood the steps involve in details one by one.

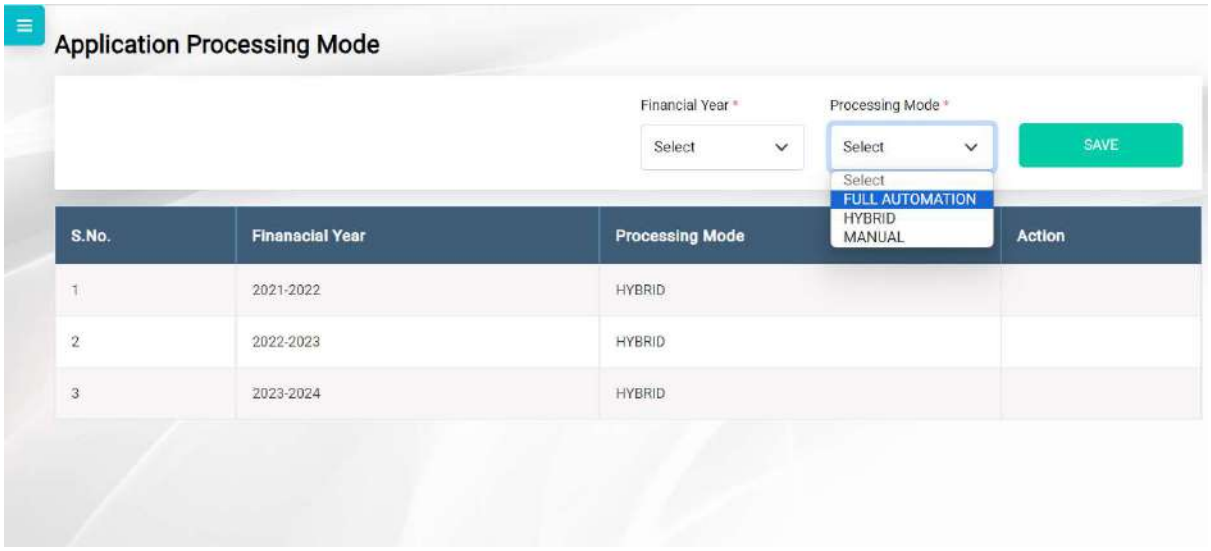

1. **Set the Application Processing Mode (Full Automation/Hybrid)**

- **HQ Admin** to Login into the Kisan Rin Portal (KRP)
- Click on **ISS Integration Settings**.
- Then click on **Application Processing Mode**.

Select the financial year and processing mode from the dropdown.

- Click on **Save** tab.

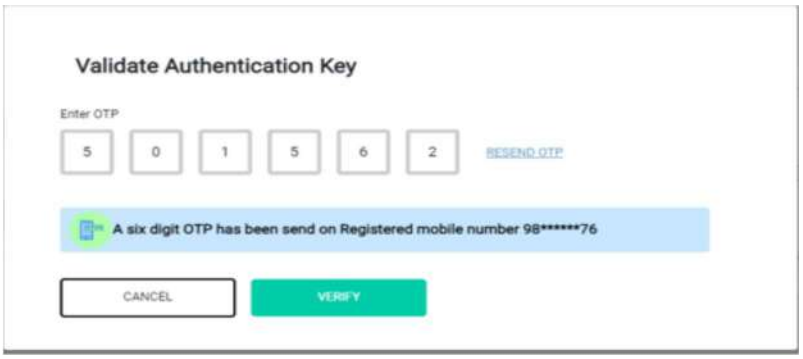

Once saved the same need to be validate with an OTP.

- User to click on **Validate** menu.

Note: Before validating through OTP user will get a chance to delete the processing mode if any changes required.

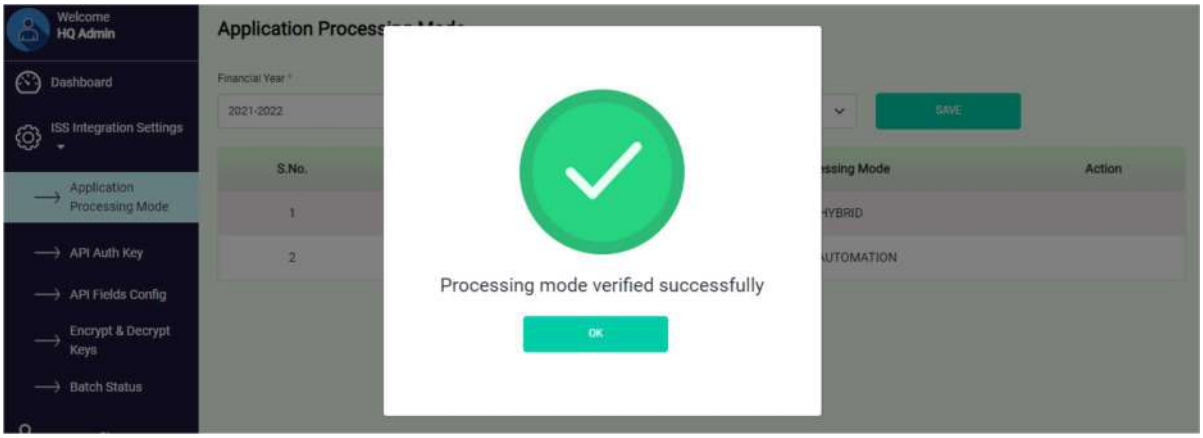

User need to enter the OTP & click on **verify** tab.

Note: If OTP not received in the registered mobile then the User can go for Resend OTP option.

Once OTP is verified a pop up message will flash and confirm that the Processing mode verified successfully.

- Click on **Ok** tab.

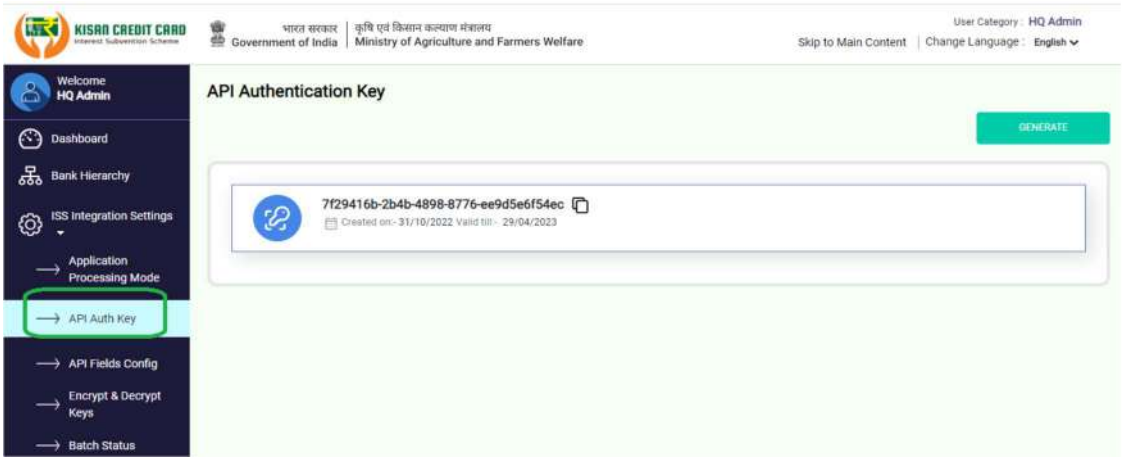

Once the Application processing mode is selected then the same can reflect on the screen.

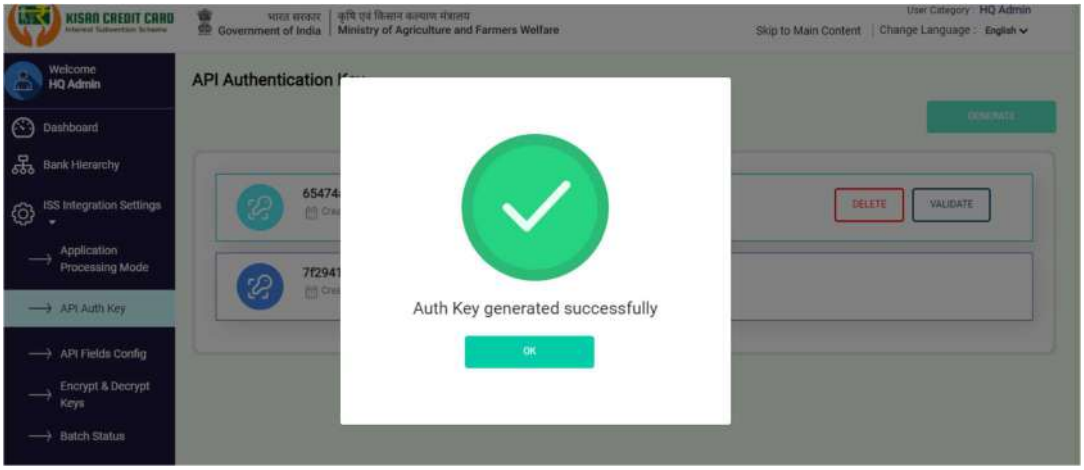

2. Generate the API Auth Key.

- Click on API Auth Key.
- Click on **Generate** tab to create a new Auth key.

Note: Auth Kay will be valid for 6 months once it is created.

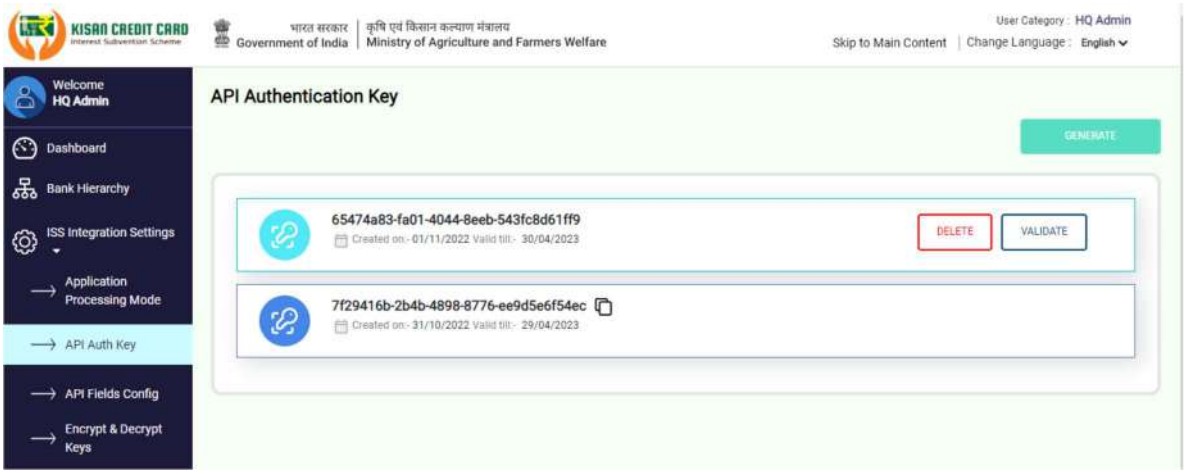

On click of Generate tab a pop up message will flash and confirm that the **Auth Key generated successfully.**

Once Auth Key generated then User will get 2 options.

Delete: If not required.

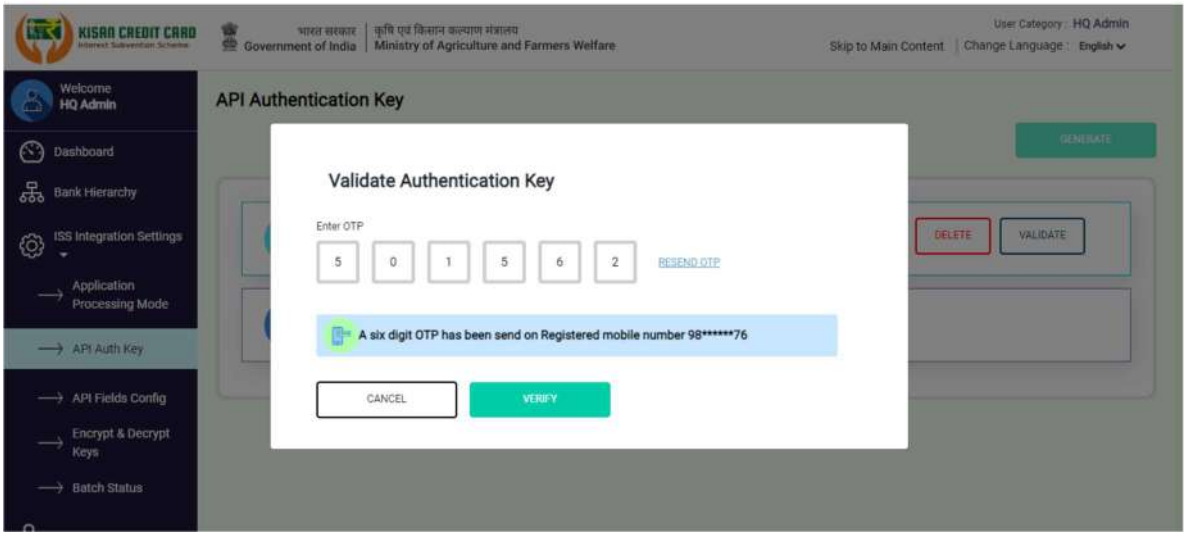

Click on delete a created Auth Key.

Note: Delete of the Auth key is possible only if it is not validated through OTP.

Validate: OTP based validation.

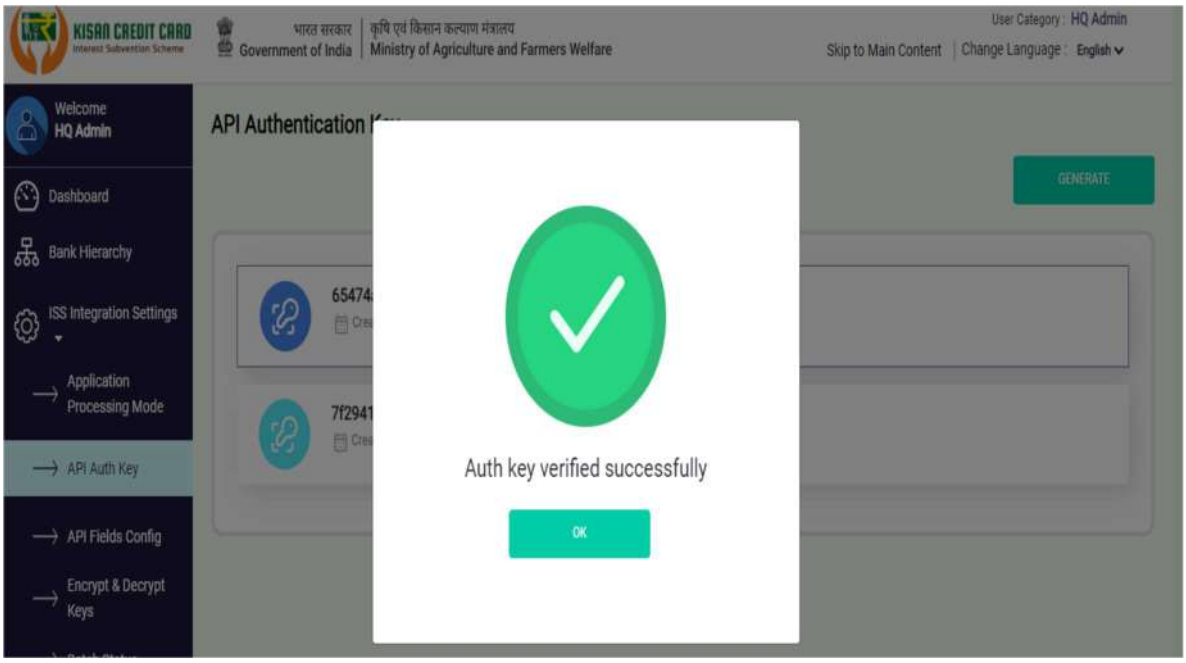

- Click on **Validate** tab to validate the API Auth key generated.
- Enter the OTP into the slot and click on **Verify** Tab.

Note: If OTP not received in the registered mobile then the User can go for Resend OTP option.

Once verified a pop up message will flash & confirm Auth Key verified successfully.

- Click on **OK** tab.

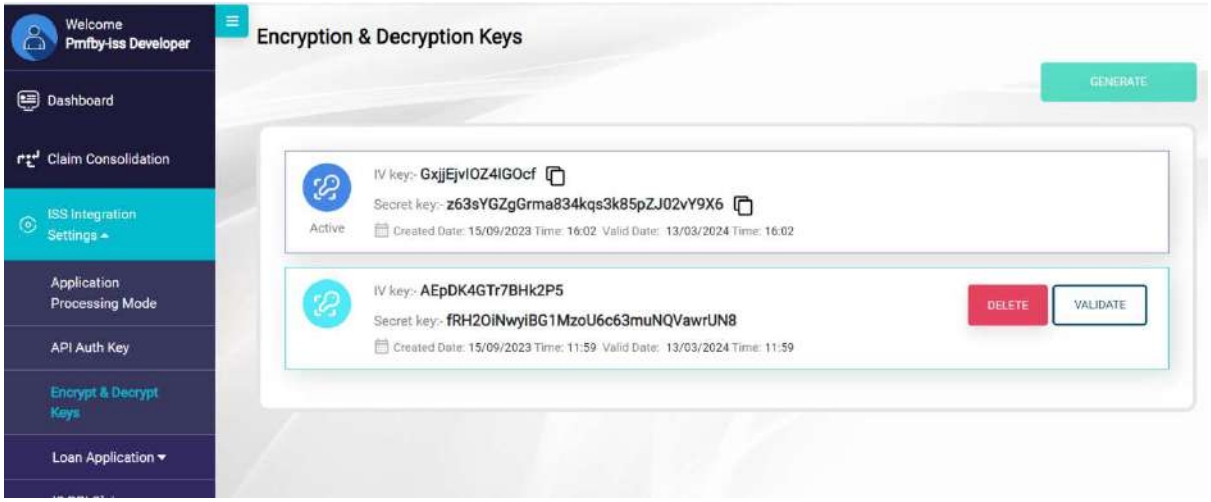

Copy Auth Key: A small copy icon is provided to Copy the API auth Key.

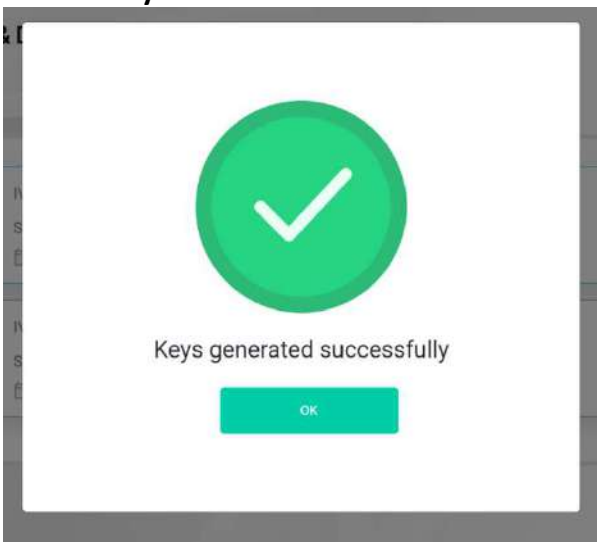

3. Generate the Encrypted & Decrypted Key.

To complete the API configuration User need to create the Encrypted/Decrypted key.

- Select the Encrypt/decrypt keys sub menu under ISS Integration settings.
- User to click on **Generate** tab.

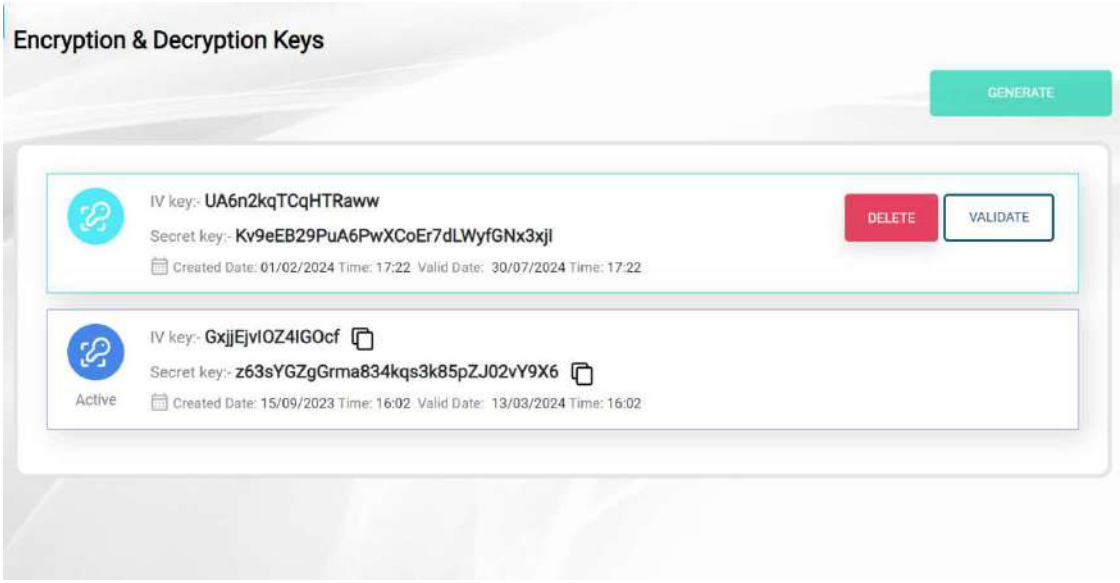

Once key generated a pop up message will flash and confirm that **Key generated successfully**.

Once Encrypt/Decrypt Key generated then User will get 2 options.

Delete: If not required.

Click on **Delete.**

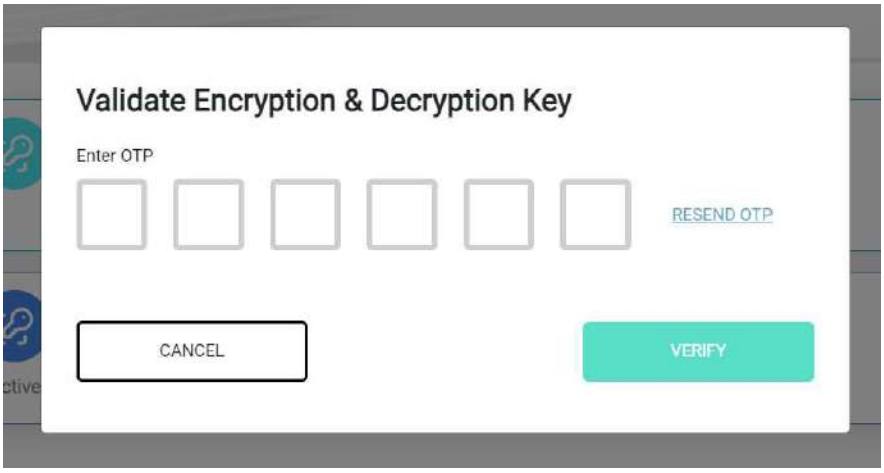

Note: Delete of the key is possible only if it is not validated through OTP.

Validate: OTP based validation.

Click on **Validate** tab to validate the API Encryption & Decryption key generated.

Enter the OTP into the slot & click on **Verify** tab

6. Creation Loan & Claim Application Full Automation & Hybrid Mode:

Once the Bank HQ Admin complete the ISS integration setting can send the API with all relevant data on payload and push it to Kisan Rin Portal.

Steps to follow to create application through API.

1. Create Payload with Required Data(including auth code).
2. Encrypt the Payload using AES-256 through Middlware Using Banks IV Secret key and IV Key.
3. Submit the Encrypted Request Payload through Middlware at the required URL.
4. Decrypt the Response that is received after submitting the Encrypted Request.

There are two systems involved in communication.

- Recipient – KCC-ISS portal of DA &FW.
- Sender – CBS/Middleware of the Banks.

Endpoints (description level) and purpose.

Both the systems will communicate only through specified IPs. Further sender will generate a token/ auth key from KCC-ISS portal using their HQ Admin credentials which shall be required for authentication of transfer before transferring of each payload & however, the sender shall have a flexibility to change the token/auth key at any point in time, accordingly the payloads shall also have the changed token/auth key as input attribute for successful transfer of payloads.

Note: If the Application created through Hybrid mode:

i. All the Created Application will visible in the Branch User login as draft.
ii. Branch User to fill up rest of the data and submit to Branch head for approval.

Submit Batch (array of Application)

Sender will submit a set of applications which are received in the form of array. Bank will generate the unique batch id. Batch id must be unique across the age i.e. it should not be duplicate at any point of time.

Batch ID shall be in below format:

Batch ID (14 Digits): ++< 5 digit running number>

If Today's date is 29 Aug 2022 the Batch id can be 29082202300001

A set of 1000 or less applications will comprise a batch, each application number must have sender's unique ID across the age and within the batch. For each successfully accepted batch, the applications of the payload will be validated and for each successfully accepted application, a recipient's unique ID will also be generated.

Sender's Unique ID (19 digits):[Batch ID 14 characters] + [5 digit running ID]

Recipient unique ID (19 digit):
[last 2-digits YY of YYYY] + [2-digit state code as per KCC-ISS Portal] + [6-digit Bank-Branch code as per KCC-ISS Portal] + [9-digit running number]

Note: if branch code is incorrect then '99999999' will be used in recipient ID [YY+99999999+ 9 digit running number]

Depending on load and system performance, the number of applications per batch may be increased in future and accordingly communication will be sent to the concerned.

The batch will be accepted on the basis of correctness of a specified JSON. After successful acceptance of the batch, a unique batch acknowledgment id (Batch ack id) will be returned. Format for Batch ack id is as below

Batch Ack Id (14 digits): DDMMYY (6 digit) + 8 digit running number

The payload is divided into two parts:

- Part 1 (Mandatory): Farmer Details (Basic Details, Residential Details, Account Details)
- Part 2 Loan Detail (Loan detail, Activities)

Attribute "RecordStatus" signifies the completeness of the record. Banker has the option to share the records in parts.

A. recordStatus =1 complete Farmer detail (Personal details tab, Account details tab) & Loan Detail (Financial details, Activity multi-select tab).
B. recordStatus =2 only complete Farmer details.
C. recordStatus = 3 (Loan detail can be updated later refer - Add Loan Detail /Activities).

Payload:

- **Record Status 1:** Complete Farmer detail (Personal details tab, Account details tab) & Loan Detail (Financial details, Activity multi-select tab)

Payload data against each API will be sent in the format shown above but it is received by the recipient in encrypted form. For this, the user sending payload has to encrypt the data (content inside the data node) and then send to ISS portal.

Submit Claim Batch.

With this API, banks can submit their claim-details in the form of batch(s).

Note:

1. Kindly pass 1 for COMPLETE and 2 for Partial-claim for submission Type node.
2. Farmer-mobile and Aadhar of Joint-account holder must be saved on system.

13.6. Add Loan Product

13.6.1. Create Loan Product by Branch/PACS User

Branch/PACS User to login on Kisan Rin Portal.

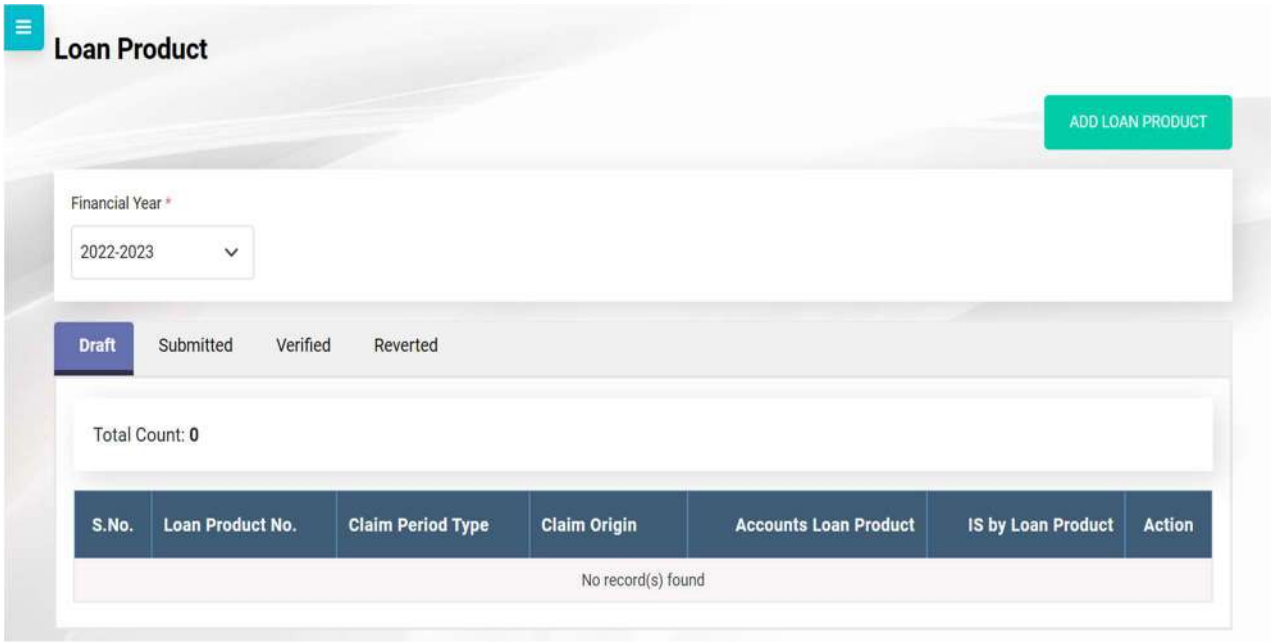

- Click on **Loan Product** sub menu under Setting menu.

Once the Loan Product page appear on the screen.

Click on **Add Loan Product** tab.

Note: Loan Product is only applicable to **IS claim**.

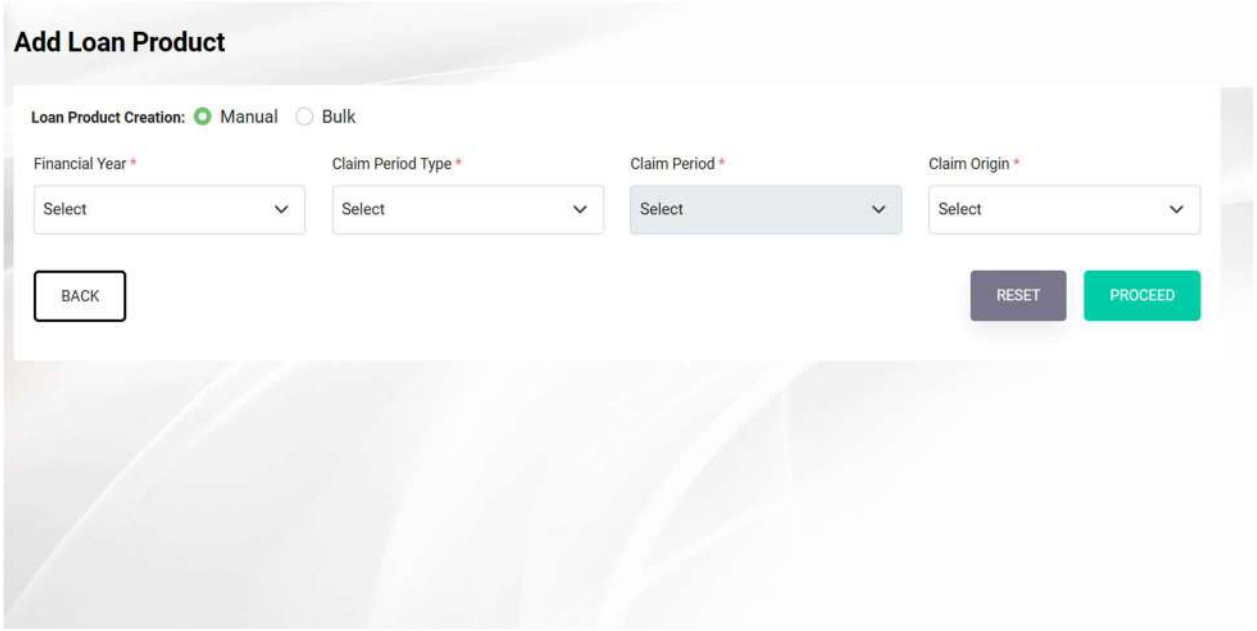

Once the **Add Loan Product** page appear on the screen.

2 radio button option will be available to add the loan product

- **Manual**
- **Bulk**

Note: Loan Product is only applicable to **IS claims**.

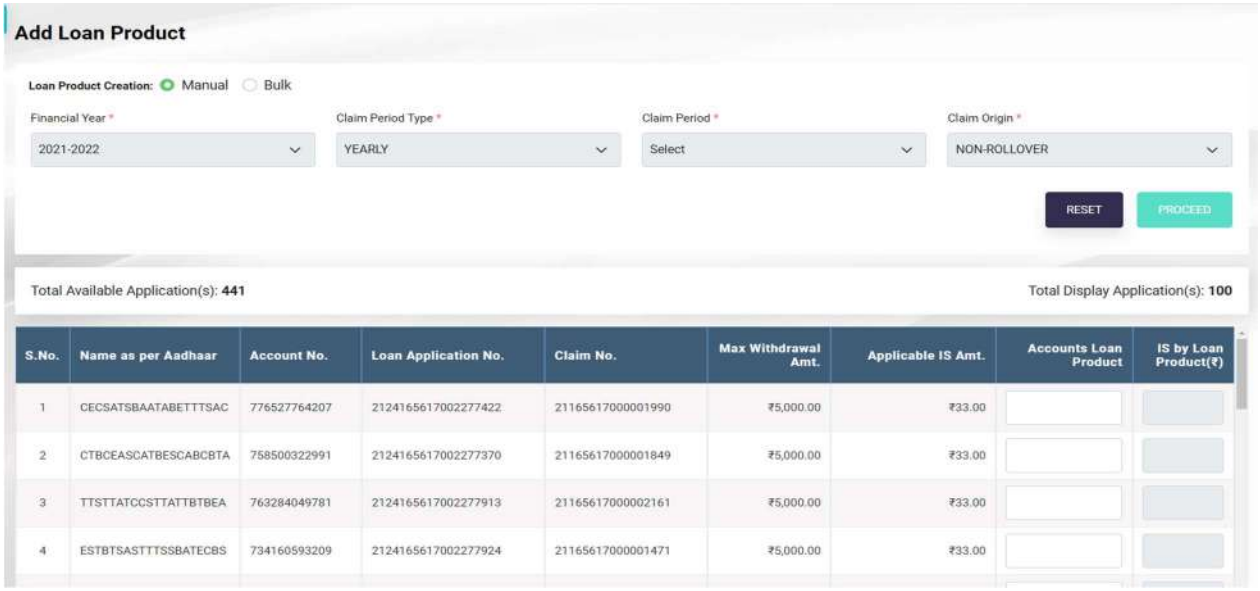

Manual:

Select radio button.

- Financial Year.
- Claim Period Type
  - Yearly.
  - Half Yearly.
- Claim Period.
  - 1st Half (APR-SEP)
  - 2nd Half (OCT-MAR)
- Claim Origin
  - Rollover
  - Non Rollover

Note: Only approved "**IS Claims**" will be retrieved for loan product creation.

Click on **Proceed** tab.

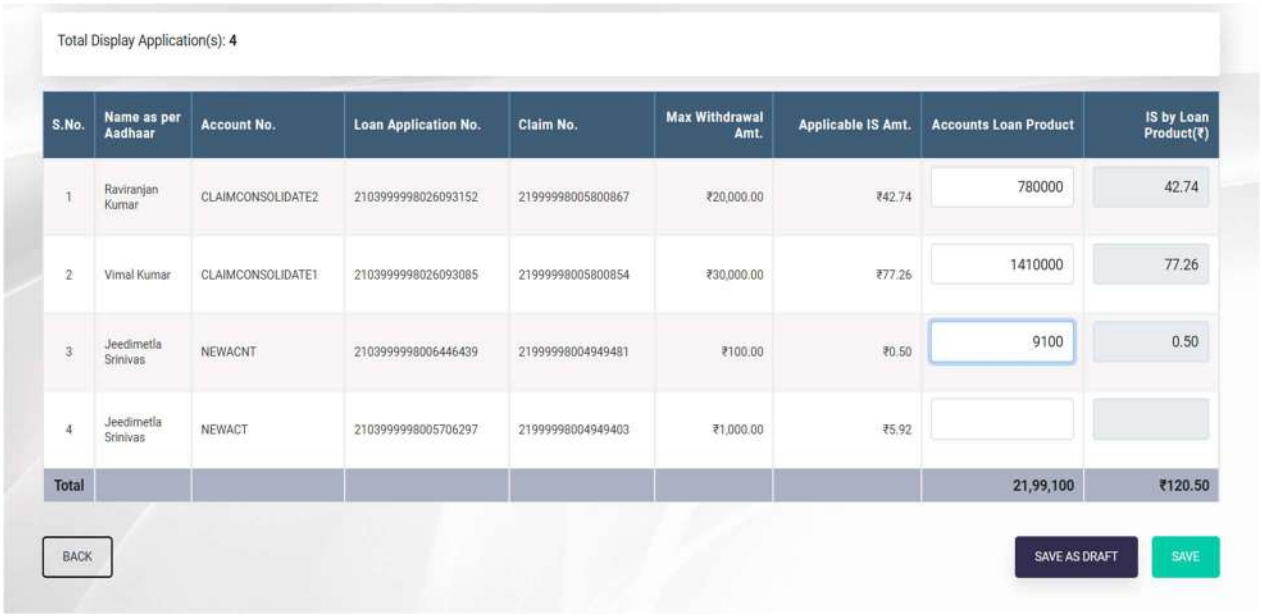

Once the individual Farmer details appear on the screen.

Enter the Loan Product of each Farmer.

Calculation.

- **IS by Loan Product** = Account Loan Product*1.5/36500
- Account Loan Product = Loan Sanction Amount (Max withdrawal amount)*No of Days
- No of Days = Loan Repayment date – Loan Disbursal date.
- IS Amount Entered <= IS by Loan Product.

After entering the Accounts Loan Product the IS by Loan product will automatically calculated.

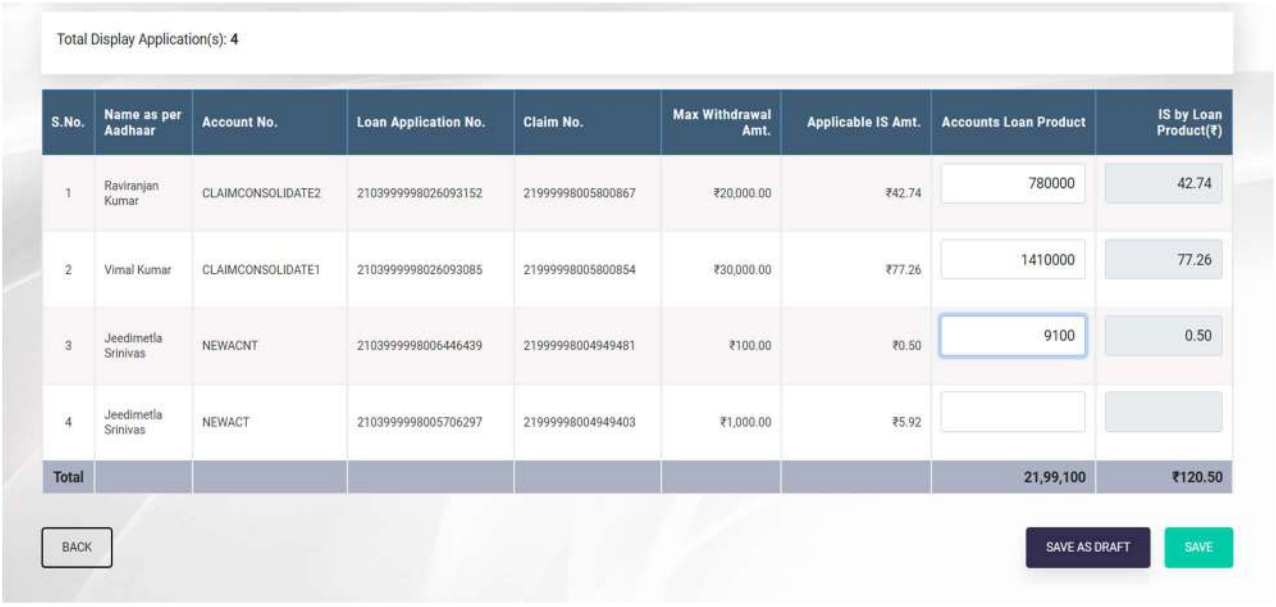

Once all the details entered user will get 2 option.

- **Save as Draft.**

Keep the Loan product in Draft mode for future modification.
